# **University Financing**

By DR. EDWIN G. KOCH

Biennial budgets covering the 1963-65 biennium for the six units of the University of Montana were approved by the State Board of Regents and by the State Budget Director at the October 8 meeting of the Regents. These budgets will provide \$10,-527,168 for Montana State University, \$11,085,748 for Montana State College excluding the Agricultural Experiment Station and Co-operative Extension Service, \$1,481,636 for Montana School of Mines including the Montana Bureau of Mines and Geology, \$1,-118,749 for Western Montana College of Education, \$2,955,511 for Eastern Montana College of Education, and \$1,584,810 for Northern Montana College. These budgets are made up from the university millage tax income, income from veterans education, income from state land endowment, student fees, gifts and grants, sales and services, and miscellaneous sources, with the balance from state general fund appropriation. For Montana School of Mines, this analysis results for the biennium in \$170,660 from fees and collections, \$131,800 from other sources, and \$1,179,176 from state appropriations. \$255,264 is the Portion of the total biennial budget allotted to the Bureau of Mines and Geology.

As a result of complete co-ordination and co-operation among the six university units, the State Board of Regents, and the State Budget Director over the past several months, the 1963 legislature will be presented one budget upon which all parties concerned are agreed. All unit budgets were prepared under the Board policy of maintaining existing programs, with no new or expanded programs envisioned for the coming biennium, and with all necessary monetary increases based on the 1962-63 operational level and geared to providing necessary essential operating funds on a program basis. In all phases of budget preparation and evaluation, all units of the University were given equal consideration and proportional increases over the 1962-63 base.
Salary levels are uniformly

based for all units upon maintaining a competitive level with neighboring educational institu-tions with which they must normally compete for personnel. Increases for the 1963-65 biennium over the 1962-63 level of operation include provisions for salaries, wages, supplies and operational expenses, equipment, and maintenance. These increases for all units of the University are uniformly based, and the in-

# Senior Trip?

concerning the possibilities of a senior trip is underway. Should we go? Where should we go? How long should we take? What

The Petroleum and Geology seniors plan to travel to Denver in May to attend a convention. During their stay they intend to tour such plants as Gates rubber plant and a missile-construction plant. An invitation is extended to all seniors to take the trip. It has been pointed out that such a trip will be equally "educational" for all. Travel will be via car to cut expenses and allow for inspection of points of interest along the way. Twenty dollars was one estimate for travel expenses.

Up until now it's "the Pet's to Denver, but the Met's can't spend'er."

For courses not listed above the instructor will arrange for the time and place of examination.

In cases of conflict in the above schedule, students will make arrangements with the instructor of the higher numbered course for an examination at some other time.

# bany, Oregon.

The annual debate or discussion are the expenses and so forth? It appears rather definite that some seniors will travel this spring.

The general concensus of opinion around the Metallurgy building seems to favor such a trip; however, financial conditions are such to render such a trip almost impossible. Preparations for marriage along with present expenses already point to deficit spending by some. Others sense an injustice of a husband taking a trip while the working wife foots the bill. One metallurgical engineering student suggested the possibility of a short trip through Great Falls, Columbia Falls, and some parts of Canada.

# **Charles Olson** Wins Election

On Thursday, December 13, an election was held to select a new Delegate-at-Large for the Student Council. Three candidates indicated their willingness to run; they were Wayne Lenton, Charles Olson, and Frank Trask, III.

The final tabulation showed that Olson had a majority of the votes with 104, that Lenton was second with 67 votes, and that Trask was third with 32 votes. A total of 203 students voted, approximately one-half the student

# 5 Top Stories In 62

Leading the 1962 news picture about Montana School of Mines were these five major stories:

1. The college achieved the highest enrollment in its sixty-nine year history.

The M atop Big Butte was electrified.

The football team won in its forty-fifth consecutive attempt at victory.

4. The beds in the Residence Hall created an uproar.5. The Metallurgy, and Mineral Dressing Departments received sizable research grants.

There were many other stories of importance to Montana School of Mines including a number of firsts. This was the first year in which a fraternity had purchased a residence for its members, in which Montana School of Mines undertook to offer a TV course for college credit, in which our students attended the Montana Power Company management clinic, in which Mines students went to work as drivers in the Berkeley Pit, in which NAIA recognition had come to the college.

The retirement of Earl Denny as campus foreman, the selection of Carol Dunstan as Homecoming Queen, the announcement of the seven seniors who "made" Who's Who, the address of Justice Harrison to the graduating seniors, the cost of living increase in the Residence Hall, the addition of four new members to the faculty of the college, the announcement of Sahinen's appointment as associate director of the Montana Bureau of Mines and Geology, and Stout's headship of the Department of Mechanics and Electricity were all items of exceptional in-

College Enrollment Reached 412 In 1962 the college enrolled over 400 students. When final figures were reported to the executive secretary of the university system at the close of registration on October 5, the first semester became numerically the

largest in the college's history. More than sixty girls were registered in the college's various offerings. The addition of so many young women has had a noticeable effect about the cam-

The Electrified M

On Wednesday, May 1 Governor Tim Babcock threw the switch that gave Butte a lighted

M. The project which had been undertaken with the cooperation of the alumni, students and faculty created a beautiful sight for the entire community.

The M which measures 90 feet by 90 feet was built in 1910 atop Big Butte. The placing of retaining walls and reshaping of the letter gave it the rigidity needed for the installation of wiring.

The change in the color of the bulbs to honor various holidays and seasons has made our M the pride of Butte. Red, white and blue bulbs heralded the Fourth of July and red and green bulbs an-(Continued on page 4)

Almost ready to throw the switch.

### **OUR ATHLETES**

All persons connected with Montana School of Mines are proud, and we are proud for a just reason. Two of our more able football players have been honored by the National Association of Intercollegiate Athletics with honorable mentions on their All-American football team. We are further elated by the fact that no other athlete or school in the Montana Collegiate Conference has been so

Charles "Fuzzy" Olson and George Sever are the two that, by dint of their football prowess, brought glory to MSM. This nationwide recognition proves to us, beyond the shadow of a doubt, that people who participate in sports for the love of the game are among the best of athletes. It is a notable fact that our players at MSM play ball for no more renumeration then the possibility of being adorned with a figurative olive wreath. We feel that this fact may be one of the reasons that our players were selected over others in our conference.

Contrary to some people's beliefs we are certain that this is one of the highest honors that could be accorded to these players and to our school. We hope that in the future, the continuation of our present sports policy will bring many more such honors to our campus.

### **PARTICIPATION**

An election was held recently on the Montana School of Mines campus and people were completely apathetic over it. The candidates hardly went to the trouble to make themselves or their platforms known. Only one went to the trouble of putting up posters identifying himself, but he gave no indication of his platform, ideas, or qualifications. Another candidate hoped that people would remember his appearance, for he made no attempt to have his identification placed on campus. This candidate did, how-ever, list his platform and qualifications, which was an exemplary act. The last candidate made no attempt whatsoever at campaigning. The election became a popularity contest. However, the electorate is to share much of the blame, for less than half of the student body voted. Furthermore, of those that voted, there were many that did not even find out what they were voting for.

This situation is indicative of a more serious problem that exists on our campus. A certain inertia exists among the students in regard to their participation in valuable extra-curricular activities. For instance, less than one-fifth of the total membership of the Anderson-Carlisle Society attended a valuable speech given on December 17. Remember, there is more to your education than the perfunctory attendance of classes.

## In Recognition

MRS. DOROTHY NILE

#### By BRENDA BROPHY

There are on the School of Mines campus many hard-working but unrewarded staff members.

Mrs. Dorothy Nile, who runs the book store has a tremendous job to do. Mrs. Nile was born in Cascade Locks, Oregon and attended schools there. She is married to Dr. Stephen Nile, professor and head of the Department of Physics at Montana School of

During past years Mrs. Nile worked in various libraries back East and was a computer in the Mathematics and Physics Department at Princeton University. This is her nineteenth year of service at the Montana School of Mines.

The book store entails a lot of work. One of a few of the jobs that have to be done is: ordering books and supplies and counting and selling them. Mrs. Nile also runs a verifax copying machine, binds reports and laminates things in plastic.

Mrs. Nile, an avid photographer, spends a great deal of time on her hobby, photographing anything that catches her eye. In years past she took pictures for the Magma and occasionally photographs functions on campus. In addition to photography, Mrs. Nile also enjoys hiking and mountain climbing.

# Campus Ogranizations

### SIGMA RHO FRATERNITY

In 1894, at the Michigan School of Mines, the first professional fraternity was established for the purpose of aiding and bringing the members more closely together, and helping each other in every way pleasantly to pass their college days. The fraternity was established for undergraduates in the mineral industries and was named Sigma Rho.

In 1927 a chapter of Sigma Rho was established at Montana School of Mines and has been an Make-Up Editor active organization on Montana School of Mines campus since that time. The newest addition to the Sigma Rho chapter is the Fraternity House, which was purchased in the spring of 1962.

"Some men grow, others

# MSM To Have Freedom Shrine

Montana School of Mines will soon display a collection of twenty-eight historical documents symbolizing freedom in the United States. This collection, called the Freedom Shrine, can be seen in both high schools in Butte.

After five years of indecision as to where this display would be hung, it has been agreed by the Student Council and the Board of Control of the Student Union Building to display it in the study room of the Copper Lounge. Early in January, dedication ceremonies will be held with the National Exchange Club which provided the Shrine. The exact date has not been decided upon.

A list of the documents in the collection follows:

Declaration of Independence, Bill of Rights, "Rough Draft" Declaration, Franklin's Epitath, Patrick Henry's Instructions, John Paul Jones' letter, Deborah Gannett's Deposition, Treaty of Paris, Washington's "Last Let-ter", Washington's First Inaugural, Northwest Ordinance, Washington's Constitution, Jackson's Letter, "The Star Spangled Banner", Monroe Doctrine, Emancipation Proclamation, Gettysburg Address, Lee's Letter, 13th Amendment, Overlord Agreement, Selection of Eisenhower, McAuliffe's Christmas Message, German Surrender, Japanese Surrender, United Nations Charter.

Associated with this project are professors Harnish and Stout.

# Anderson-Carlisle Addressed

Clifford Hicks, Western Field Secretary of the American Institute of Mining, Metallurgical, and Petroleum Engineers, spoke to the Anderson-Carlisle Society of the Montana School of Mines about the functions and duties of the AIME.

Mr. Hicks graduated from the University of Wisconsin in Min-ing Geology. He worked for the Army's Corps of Engineers for three years after graduation, and then worked for the Anaconda Company for thirteen years. When he left the Company he was Senior Geologist at the Kelley Mine. The AIME has been his employer for the last three years.

His speech included helpful suggestions to the society about methods of increasing membership by promotional activities. The meeting was followed by refreshments.

### Christmas Tree Party Held

A Christmas tree party was held by the Associated Women Students on the evening of December 15 in the Copper Lounge. All co-eds and their dates and the Sigma Rho fraternity members were invited. Refreshments were served. Peggy Davis acted as chairman of this activity.

### Co-Eds Have Christmas Tea

The A.W.S. of Montana School of Mines held a tea in the Co-ed room on the afternoon of Dec. 14. Salad, tea and cookies were served. All girls attending exchanged gifts. Among the treasures received were one live gold fish and one live turtle. Ask Kay Chambers and Barbara Rauch about this. Mrs. Louise McBride, advisor to women students, was also present. All arrangements for this party were made by Beverly Phillips.

### The Sugar Plum Fantasy

Despite the unfavorabel comments of the males on campus about the selection of a theme for our dance this year, it nevertheless turned out to be a huge success. The Copper Lounge was adorned with decorations in the true spirit of Christmas. Those attending danced to the music provided by the Black Knights of

### Mrs. Koch Offers Open House

Mrs. E. G. Koch invited all the co-eds at Montana School of Mines to an open house held on Friday, Dec. 21st, in her home. This was her way to extend holiday greetings to the women students on campus. All the girls would like to express their appreciation to her for her graciousness and hospitality.

### Young Speaks In Utah

Mr. Francis M. Young, Montana School of Mines Department of Mechanics and Electricity, presented his paper "The Secondary Breaking Effect of High-Frequency Electric Energy Applied to Rock Fragments," at a December 13 meeting of the Utah Section of AIME.

The meeting, at which Mr. Young discussed the results of work conducted under a research grant to Montana School of Mines by the Anaconda Company, was held in the Newhouse Hotel, Salt Lake City, Utah. He described the methods utilized and some of the unknowns in the new rock breaking technique that was shown to be feasible by his re-

# Club News

Sigma Rho Fraternity

Sigma Rho Fraternity members living in the house have initiated the practice of inviting several suests for Sunday dinner. On December 16, we were pleased to have Marvin Senne, Regent of Theta Tau Fraternity, Mike Arne, Paul Komarek, and Kent Taylor for dinner. For future Sundays the fraternity plans to invite officers of clubs and organizations, students, and faculty members.

The weekend before Christmas vacation we made a major addition to the first floor furnishings of the house. Using Dave Rovig's truck, some of the more beefy members moved in an upright piano. Earlier in the week the fraternity voted to purchase the instrument. The piano, formerly a player type, is in good condition, and it reduces the bareness of the large living room.

### Glee Club

The officers are Don Hruska, President; Janice Roberts, Vice-President, and Sharon Breen, Secretary-Treasurer. Don Hruska, Jon Engleking, Sam Higginbottom, and Bill Coughlan recently formed a quartet. Professor Smith is planning some programs following the Christmas holidays.

### Chess Club

The Chess Club held its first meeting on Monday, December 3. Officers elected were Bob Norton, President; and Carole Anne Stevens, Secretary. The advisor is Professor Adam J. Smith. A chess tournament is being planned following semester examinations.

International Club

On January 11-12 the Third Annual Montana Model United Nations will be held at Rocky Mountain College, Billings. Ornie Gutfeld will head the School of Mines delegation, which will include Mansoor Awan and Don Bruska. The MSM delegation will represent the Philippines.

Theta Tau Initiates

Theta Tau Lounge was the scene of the initiation of three new active members on the eve-John Ceserani, Metallurgy, Ken Arne, Mining, and Bill Watkins, Petroleum, were admitted to Psi Chapter. Following the ceremony, the new members attended a party and an impromptu limbo session at one of Butte's popular night spots.

# Scholarship; Loan Funds Alumni Group

neering education at Montana School of Mines is low, many students with high ability need assistance in the form of a scholarship or loan.

Advanced scholarships are awarded to undergraduates in attendance at the Montana School of Mines, exempting the holder from state fees for the following year. The basis of award includes scholastic record, other especially meritorious student performance, financial need, and the character and promise of the applicant. This scholarship is granted for one year, but the individual may renew his application for successive years. These advanced scholarships are awarded automatically to five percent of the engineering students in the sophomore, junior, and senior classes, whose grade point indexes for both semesters of the preceding year are highest.

In addition to these scholarships, awards by various industrial firms are granted each year

# SUB Manager

There are quite a few individuals who figuratively "live at the SUB", but David Greenberg is the only student who literally lives there. Dave is the student manager of the Student Union Building for this school year. As student manager, he is responsible for the scheduling of special events and is usually on hand if the organizations sponsoring the event need any additional help. Managing the game room and oc-casionally "setting down on the kids" are some more of Dave's duties. Often he is called upon to do some general maintenance work. The fact that the home which the SUB offers him is very near to school is an added advantage of the post.

Dave was recently honored by being selected a member of "Who's Who". Despite the long hours required by his work, he has maintained a 3.0 grade average and was the recipient of the American Smelting and Refining Scholarship of \$500.

Another person lives in the SUB, and that is Dave's wife, the former Agnes Howe of Butte. Dave himself is from Flin Flon, Manitoba and after graduation plans to work in British Colum-

Although the cost of an engi- to worthy students. Among these grants is the Billings Petroleum Section of the A.I.M.E. Scholarship. This award of three hundred dollars is made annually to a senior or graduate student en-rolled in the Department of Petroleum Engineering who has high moral character promising credit to his profession. He is required to be a junior or student associate of A.I.M.E. Another industrial firm grant is the American Smelting and Refining Company Scholarship which awards one thousand dollars, five hundred of which is awarded to a student of mining and five hundred dollars to a student of metallurgy. These two students are chosen by their respective departments. A third industrial firm award is the American Society for Metals Scholarship which offers an undergraduate scholarship to a student in Metallurgical Engineering in the amount of five hundred dollars. Award is based on recommendation of instructors, scholarship, character, and engineering promise. Another industrial firm award is the Anaconda Company Scholarship from a grant of \$3000 payable to sons and daughters of employees of the company. Recipients must be engineering students in the Mining, Metallurgical Mineral Dressing, or Geological Engineering curricula. In addition, the Anaconda Company Research Fellowship of \$7500 per year has been granted to support five cooperative graduate research fellowships in the Geology, Metallurgy, Mining and Mineral Dressing departments. Other industrial firm awards are the Continental Oil Company Fellowship and Great Falls Breweries Montana Distributors Scholarship which offer grants to students evidencing financial need, leadership and citizenship. In addition to these scholarships, awards such as the Montana School of Mines Student Loan Fund, Gino Diamant Scholarship, Theodore Simons Memorial, National Defense Student Loan Fund and others are granted in amounts according to the financial need of the student.

The applications for these scholarships and loans must be in the Registrar's office by March 1 and are awarded for the following academic year.

# Is Formed

At an initial gathering of Mines graduates in Billings, Montana, plans were formulated to organize an alumni club in the Billings area. The main purpose of such an organization would be to promote the School of Mines and particularly the Petroleum Engineering Department.

Bill Pickard '62 who has been instrumental in organizing the alumni in the area reports that the following graduates attended the initial gathering: Dick Siguaw '57, Howard R. Lowe & Assoc.; Gus Coolidge '59, Humble; Doug Wadman '60, Humble; Joe Bato '59, McAlester Fuel; Aut Taln '55 Humble: Dick Art Talp '55, Humble; Dick Engebretsen '59, Pan American; Jack Nordquist '45, Consultant; R. C. Rockwell '49, Mud Control Labs Inc.; Arden Blair '48, Consultant; R. G. Mock '60, Shell; and Gary Riley '60, Schlumberger berger.

The organization meeting will be held in the Petroleum Club in Billings on the second Tuesday of January. Once organized, the meetings will follow a regular monthly schedule.

Additional graduates in the Billings area who have expressed interest in an alumni club but were unable to attend the initial meeting are: John Warren '50, Farmers Union; Wes Davis '43, Texaco; Willard Leskela '48, Phillips; Miles Pepper '55, Amerada; Bob Newman '61, U. S. Govt.; Dick Osterman '59, Northern Testing Lab.; Duane Diekman '58, East-ern Montana College; Bob Covlin 53, Pan American; Dick Hunt '61, Pan American; and Norm Warberg '50, Consultant.

#### For the Love of a Bed

Beds were the complaint of some sixty students who demonstarted on the evening of March 13. Signs and a bonfire were further evidence of unhappiness over the condition of the sleeping facilities in the Residence Hall.

Interestingly enough the demonstration had proceeded without knowledge that on that very afternoon a contract had been signed which would have provided the Hall with some 70 brand new mattresses and beds. Dr. Koch indicated that he had previously informed one of the Hall leaders that beds would be ordered. W. M. Brown, business manager of the college, had stated that a requisition for the purchase of the new beds had gone to the state purchasing department as early as January 19, almost two months before the demonstration.

All students now living in the Residence Hall have new beds. Research Grants

## Grants totaling almost \$120,000 had been granted during 1962 for

research to be undertaken by the Metallurgy Department and the Mineral Dressing Department. The Metallurgy Department re-

ceived a grant of \$44,500 from the National Science Foundation for a three-year study entitled, "Strain Rate Effects in Vacancy Formation." A two-year grant for \$15,621 was given by the Office of Naval Research for a study on thermodynamic properties of oxides. Drs. Griffith and Hahn were the grant recipients.

The National Research Foundation awarded \$50,000 to the Department of Mineral Dressing for work in "asphalt-aggregate reactions." Professor Donald W. Mc-Glashan is conducting the research for this two-year study. The Allis - Chalmers Company, Milwaukee notified the department of its selection for a grant of about \$9,500 for work on "The Fragmentation of Brittle Mate-

Maynard's Mob outlasted Tau III 41-38, in a close hard-fought game. Madison and Strobel shared scoring honors with 10 each while Koger dumped in 13 for the losers.
DECEMBER 12

Tau III romped the CoCo Cream Puffs 48-29. Quilici scored 14 points for Tau III, followed by Weaver with 12. Semmons had 7 for the Co Co Puffs.

Rip's Five outplayed Tau IV and came out on the long end of a 56-22 ball game. Trengrove and Johnson, the fearsome two, paced the winners with 14 apiece, while Nellis and Lindstrom added 6 apiece for Tau IV.

### DECEMBER 13

In a hotly contested game the Chodda Choppers lucked out with a 29-28 victory over Rho II. Finley and Mooney paced the winners with 8 apiece. Kehoe failed to aid the Chodda Choppers for the 3rd straight game. Benn netted 12 for the Rho team.

Rho I trounced Rho III 72-37. Shogren scored 22 big points for the winners while Jenks netted 16 for Rho III.

### DECEMBER 17

The Flunking Five, the team picked to win the championship this year, won its 3rd game by defeating Maynard's Mob 49-40. Richards paced the winners with 19 while Madison scored 18 for the losers.

Co Co Puffs beat Tau I 31-26. A new carriageless electric Semmons scored 9 for Co Co typewriter can tap out 186 words Puffs while Evans dumped in 18 for the losers.

# Raif Zacca

Many of the foreign students on campus are very active. One especially so, is Raif Zacca. Raif was born in Acia, Africa and moved to Beirut, Lebanon when he was four. He lived there until coming to this country in 1960. He attended the International College associated with the American University of Beirut which is equivalent to high school in this country. The Dean of the school recommended Montana School of Mines to Raif because he was interested in mining engineering.

Raif was planning on transfering to the Colorado School of Mines this year but he was touched by the hospitality and kindness of the people in Butte and so decided to stay here. Raif is the first Lebanese person to study mining. He plans to do graduate work and go into business for himself.

Raif is president of the International Club, an active member of Sigma Rho and is taking over Mr. Onart's place as the French teacher.

## January Interview

The U. S. Atomic Energy Commission, Idaho Falls division will interview all interested senior and graduate students on January 10,

# Pets Push Thru

On November 20 the junior and senior petroleum engineering classes attended a laboratory session conducted on a Superior Oil Company wildcat drilling rig located east of Livingston, Montana. The students braved rain, snow, high winds and waist-deep mud to arrive at their destination. Due to the muddy condition of the road leading to the rig, which was located at the bottom of a hill, several cars parked at the top of the grade and a babbling horde of students under the command of Professor Harnish descended upon the well-

Professors Harnish and Stolz provided the students with an explanation of the rig components and their operation. A company geologist outlined the basic sub-surface geology in the area, and explained the operation of the equipment he used in the performance of his duties. Messrs. Bronson and Peters explored the depth and composition of the

An interesting aspect of the drilling was the slow rate of penetration (approximately 2 ft. per hour). This was necessary to insure a straight hole because the drill was penetrating steeply dipping beds. The rig was engaged in testing all formations down to 7,500 feet.

Leaving the rig under cover of darkness, a muddier but wiser group of students headed for Livingston. They were aided enroute by a band of stalwart lads again under the leadership of Professor Harnish - organized to push ensnared vehicles from various mud traps.

For a short time, alternate Plan "C" (stop at Livingston and partake of some well-deserved brew) was put into operation; however, the plaintive cries of one "Luscious Louie" insisting that he must return to Butte for the BIG DANCE scuttled the plan. During the remainder of the trip, George Bronson repeatedly, and in great detail, described his encounter with the mud tanks. Students making the trip were as follows: lowly juniors Burke, Busenins, Calahan, Gosnell, Lane, Madison, Martin, Mazza, Parekh, Peters, Quilici, Rife, Strobel, Schumacher, and Stowe; and exalted seniors Bilyeu, Davis, Erickson, Gott, Hill, Nellis, Watkins, and Bronson.

Although Americans are getting taller and heavier, hat manufacturers report most people still buy hats size 71/2 or smaller.

#### FINANCING -

(Continued from page 1) creased costs fall within revenues believed by the Budget Director to be available for the purpose intended under the present tax structure. Thus, the legislature will be requested to approve a budget which is attainable within state income.

While essential increases are provided, the 1963-65 budgets continue to refelct deficiencies in all principal budget categories, with the major deficiencies existing in deferred maintenance and physical plant operations, and with lesser deficiencies in equipment, departmental operating funds, and salaries. Thus, it may be concluded that these budgets constitute a reasonable compromise between the operational financing which may be available and what the various units need.

## Aliens Must Report

The federal government requires every person who is not a citizen of the United States to report his address to the government each January. The government has printed cards which non-citizens use to report their addresses. The cards are available at post offices or Immigration and Naturalization Service offices.

This notice does not apply to you if you are a citizen of the United States. However, you will be assisting the government and any of your friends who are not United States citizens if you will remind them of the address report requirement.

Charles Freville-Heygat won a cake-baking contest, defeating 10 other competitors — including his mother.
