M DAY
COMMENTS FROM THE FRONT OFFICE

by J. R. Van Pelt

SCRD VISITORS

Today, April 28, the School of Mines welcomes to the campus Professor Fred Merryfield of Oregon State, Professors Lydal Shaffer and John Putnam of the University of California, Dr. Dana W. Smith of Kaiser Aluminum, and Dean Tom Kerr of the University of Idaho. For two days you may see them around the campus as they make the regular five-year inspection of the School on behalf of the Engineers' Council for Professional Development.

M-Day Comments

Next Wednesday, May 4, comes M-Day, if the weather man cooperates. The Senior Class President is the man in charge of clean-up. A morning’s work—actually more fun than hard labor—cleans up the campus and gets the "M" painted. Be sure you get in on this clean-up; then you’ll be entitled to enjoy the rest of the program.

Here’s a suggestion: After the clean-up comes a lunch. The lunch involves pop bottles, food wrappers, and other trash. What shall we do with this trash—throw it on the newly-cleaned campus? Last year the area around the gym was actually dirtier after M-Day than before. Trash containers will be placed near the gym; let's throw all trash in them, not on the ground. Thanks for cooperating!

The Tom Davis Memorial

One special reason for the suggestion above is this: on the day after M-Day, the Butte Rotary Club meets on the campus to make formal presentation to the School of the Tom Davis Memorial Record Collection and Hi-Fi player. We'll want to put our best foot forward for them.

By the way, do you know about the late Tom Davis, in whose memory this presentation is being made? I wish all of you could have known him. He was a leading Butte attorney, but that's only a small part of the story. He never talked much about the ways he helped young people, but helping them was his hobby. Without giving away any secrets, I can say that there are some top Montana citizens, and also some successful M.S.M. alumni, who look on Tom Davis as the most important factor in guiding them into really useful careers.

The Butte Rotary Club, donors of the memorial, is one of 8,306 clubs scattered throughout the world, all working under the motto, "Service above Self". From the 400,000 members of Rotary International, one is chosen each year as president. This honor came to Tom Davis in 1941. In this capacity he traveled all over the world, bringing honor to himself and to his home town, but giving far more to the organization.

Tom Davis served for many years as a member of the local Board of M.S.M.; he was a member when he died a year and a half ago. Mrs. George Sarsfield, whom some of you know as part-time instructor in charge of Physical Education for women, provides another tie-in between the School and the Davis family, for she is a daughter of Mr. and Mrs. Davis.

Beginning on May 6, students and faculty members may borrow records from the Library. They may also use the hi-fi player during the hours when the Library and the Museum are both open, and at other times by special advance arrangement. You'll be interested to know that all records requested by students, faculty members, and the Glee Club have been ordered excepting a few that are no longer available.

BECAUSE OF M-DAY, NEXT WEEK’S ISSUE OF AMPLIFIER WILL BE OUT BEFORE WEDNESDAY. ALL POLITICAL WRITINGS MUST BE TURNED IN BEFORE MONDAY NIGHT.
MINES PROFS TO TALK IN SPOKANE

by R. Wayment

Two faculty members of Montana School of Mines will participate in the Pacific Northwest Regional Conference of the American Institute of Mining, Metallurgical and Petroleum Engineers in Spokane during the latter part of this week. Professor Laity will present a paper entitled "Present Trends in General Education for Engineering Students", and Professor Hames will take part in a symposium on "X-Ray Fluorescent Analysis".

Professor Laity's paper will be delivered before the Mineral Industries Education Session on Thursday evening. The philosophy behind the present trends in general education in engineering colleges, the objectives of general education, and a review of how various engineering colleges are handling their curricula problems have been thoroughly explored by Mr. Laity during past years. His wide experience and knowledge in this field form the basis for his address.

Professor Hames symposium participation Friday evening will include presentation in three specific subject areas: "Principles of X-Ray Spectroscopic Analysis", "Analytical Precision and Statistical Aspects of Metallurgical Plant Control", and "Applications of X-Ray Fluorescent Techniques". Included in his presentation will be a report on x-ray spectrographic methods for analyzing soils for geochemical prospecting developed by a Montana State Bureau of Mines and Geology project headed by Dr. Hames during the summer of 1952.

Former faculty members of the School of Mines who will also participate in the annual AIME conference include Dean J. F. Spielman of Washington State College and formerly Head of our Metallurgy Department and Professor Earl C. Roberts, formerly a faculty member of the Mines Metallurgy Department and now a faculty member of the Metallurgy Department of the University of Washington. A former student of the School of Mines, James A. Foreman, now a Research Assistant at Washington State College, will also present a paper.

AMPLIFIER SAYS

Editor

The AMPLIFIER wishes to thank the student body for their increased interest in the paper. For the past two years our publication of "De Re Metallica" has been the only paper which has interested us. However, this year our student council went ahead and made arrangements with the president of the school to create a newspaper which would be active and up-to-date.

The present AMPLIFIER editorial staff, chosen by the student council, has tried to accomplish the task assigned them by the ASSM. At times we have been unknowingly prejudiced; but our objective has been fulfilled, in part. We have stimulated interest in the paper! Many students have sent in letters to your editor which contain criticism and helpful suggestions. Each day, staff members are informed of more and more student interest.

Now that we have a paper we must concentrate more and more on making it a good paper. Only truths should be printed; this has been uppermost in the minds of the staff. In addition and in line with our search for objectivity, the staff feels that every student desiring to make comments or criticisms must have the opportunity to do so. However, every student who submits an article must have his name attached to the article in order for it to be printed in the AMPLIFIER. If you're willing to write the article, don't be afraid to affix your name thereon. Again, we must bear in mind that our paper must never be a school scandal sheet! This is not our purpose. Remember we are the voice of the student body and must
refrain from printing things which may be harmful unless we have reasonable justification for doing so.

Every student is invited to write for the Amplifier. We may not print what you write in the current issue but it will be included at the earliest opportunity. Let's push the paper more than ever. Bear in mind that this is our paper and that what we say will be read by the faculty as well as the student body. Be truthful and without prejudice. Again, the staff thanks you for such a wonderful show of interest!

PROFESSIONAL BLOOD DONORS

by P. duToit

On Monday, April 24, it appeared that the Community Hospital had a shortage of blood, type A, Rh negative. The laboratory of said hospital called the dormitory and asked for Skinner. Skinner was not available. They then asked for Shahan. Shahan was not available either. The laboratory was prepared to pay $25 for a pint of above mentioned blood. Four minutes later George Mealey called the lab and offered a pint of his good red blood. George is A-Rh neg. George skipped part of the Dean's class. It was that important. Thirty-five minutes after the Dean's class started George walked in. George was pale, but he knew something the Dean did not know. George had a check for $25 in his pocket.

Later that same day, the lab called again. They wanted more blood. The M.S.M. students have good blood. This time Sherrold Moore volunteered. While watching the blood ooze out of his arm, Sherrold was thinking of being of heroic service to mankind. Sherrold was not going to take $25 for his blood. He was going to donate it. They took the pint of blood away from Sherrold. He didn't feel like he was the same man he was a few minutes before. Being weaker, he could not resist the piece of paper they handed him. (It meant $25)

George and Sherrold are now termed as professional blood donors. (Way to go boys, they'll take somebody else for it anyway!)

THE FACULTY SPEAKS

by D. C. McAuliffe

Nothing in recent years has had the incentive to stir up faculty and student interest in "What's going on around here", more than the Amplifier. As I understand, the paper originated through the student council. The idea was to convey the news to all of us on the campus, while the news was news and not history. The fact that it is now coming out on time and informing us about what the other fellow is thinking makes it interesting and worth while. All of us are looking forward to its coverage and time of issue with considerable enthusiasm.

The Amplifier has given us the opportunity to get things read, that were usually placed on the school bulletin boards and not read for one reason or another. This issue gives the athletic department an opportunity to remind you of a baseball game, which has been scheduled for next Saturday, 2:00 P.M., at Clark Park with the Mines team playing its opening game with the Montana State College of Butte. The game will be played, if weather does not interfere and provided that the city can get the field in shape. We also have a baseball game scheduled with Western Montana at Dillon on the after noon of Saturday, May 3. A return game will be played at Clark Park in Butte on Thursday, 3:30 P.M. or 4:00 P.M. A third game will be played on the following
Sunday (if necessary). A toss of a coin will decide the place of play. The winner of two out of three games will represent the Western District in Conference finals at Billings, May 13 and 14. Finals in conference golf, tennis, and track will be decided on the same weekend at Billings.

Don't forget to vote on "M" day. You'll hear more about the candidates before that time. The Student Council has decided to have the voting booth or tables out in the gymnasium or in the lobby where you can see them and to remind you TO VOTE. It is the desire of the council to have a 100% vote if possible. Last year it was only 70%. Please don't place yourself in the minority who doesn't exercise its' franchise and then "beefs" about what the Council Members are doing. If you vote you'll feel free to complain all you wish. Better yet, write the grievance if it is constructive and have it published in the Amplifier so that all the readers may have the privilege of "tossing" it around.

THE INQUIRING REPORTER

by P. duToit

What do you think of the idea of professors giving a helping hand at painting the M and cleaning up the campus on M day?

Being asked the question above, the following answers were received from several students:

Junior Student: "It is a good idea to promote student-faculty relationships, but I don't think many professors will show up."

Senior Student: "I thing they should. There is not very much participation of the faculty in student activities. I don't think they would mind it at all, as a matter of fact, I think they would get a heck of a charge out of it."

Junior Student: "Yes, I think they should. Especially in a small school like this; I think they will. By the way, they help dirty the campus, don't they?" (Do they?)

Senior Student: "That would be a fine thing. If they want to do it on our terms. It would be good especially in this case where they are going to experiment with the one leg of the "M".

Graduate Student: "Sure! They dirty the place as much as we do, especially X___, every time I see him he throws around his ashes and his cigars."

Sam Caddy: "Golly, wouldn't some of them look kind of funny with white wash all over them. By golly, they'd better stay away from the sulch or else we won't have anything left for ourselves."

Competition in debate, extemporaneous speaking, interpretative reading, and original oratory, will begin on Friday, May 6 and Saturday, May 7, at Montana School of Mines. The Forensic Club will present medals to 1st and 2nd place winners of debate and to the top three speakers. Following the meet the contestants, who represent most of the colleges in the state of Montana, will have a banquet at the Finlen Hotel commencing at 7:00 P.M.

Registration for the tournament is scheduled for Friday morning, May 6, commencing at 8:00 A.M., in Main Hall on the Mines campus. Judges will be picked from participating school faculties.

The program commences at 8:00 A.M. on both days. The general public is cordially invited to attend.
MEET YOUR FACULTY

A. Morris

The faculty member to meet this week is one you all have probably met before, but know too little about. The Professor of Mathematics at the School of Mines is Dr. Adam J. Smith, first appointed here in 1943. His cubby-hole of an office is located in the Main building, if you don't know, and this is where I found him for the interview.

His main hobbies, outside of scholastic work, are playing chess, bridge, and reading books. Since he has no wife, most of his acquaintances are chess players and mathematicians. His ambition is to have someone leave him "two million dollars so I can quit work". He expects to remain in the teaching profession, however, until the money comes.

His chessplaying deserves more than casual mention, because about three years ago he was the chess champion of Montana. He participates in all tournaments, and expects to attend one in Missoula in May.

He seemed reluctant to discuss work he did in advanced mathematics while a graduate at the University of Pennsylvania, because he felt it too difficult for most to grasp. However, under repeated questioning, he stated his work was in the field of topology or analysis situs. It is sometimes popularly called "rubber sheet" geometry, since it ignores changes caused by distortion or stretching. One of the most interesting and still unsolved problems of topology is the question: Can any map be colored with four colors so that areas having a common boundary may have different colors? Another interesting part of topology is the production of a one-sided surface formed by giving a strip of paper a half turn, and fastening the ends together.

Dr. Smith said his pet peeves were "students who do not desire to think for themselves, and want everything thought out for them". His recent election as president of the Montana Academy of Science at its most recent meeting held here at the School of Mines well reflects the quality of person preparing students at the School of Mines for a career in Engineering.

PERSONALITY SPOTS

by G. Nichols

As he was innocently walking down the stairs of Main Hall, Jim Shea was the student quickly victimized for a "speedy" interview. This dark-haired, rather quiet individual with a fiery "blush" is a home-grown product of Butte. His high school career terminated with the class of '47; his college career beginning the following fall. Finding school rather taxing and a "wee" bit on the monotonous side, he exchanged it for a three year stretch in the service. After training in Lackland, Texas, the majority of his time was spent in Germany, with occasional trips to Ireland, Switzerland, France and other points in Europe. After building enough courage to tackle M. S. M. for a second try, he hopefully re-entered. Now in 1955, we find him with the Junior class, (he hopes), his option being petroleum. The question of spare time rated only a (?), but reliable sources report an interesting habit termed "partying". Undoubtedly he is one of the many ardent supporters of the "Student Union" and "occasionally" drops in as so many "occasionally" do.

As the subject of M day was approached, a rude interruption was made by one Jonas "Babs" who was eager for some "home brew" (coffee). Anyway as the old saying goes, "What we don't know, we'll manufacture"--so "Danke schön", Jim!
Conforming with tradition, the Theta Tau Fraternity has been the most active organization of its kind on this campus during the past year. Besides reviving the Intramurals, (and taking a very active part therein) its members have been the backbone of almost every extracurricular activity. A very recent survey has brought to light excellent examples to support this statement. It revealed the following representations of Theta Tau members: Student Council 67% Football Team 50% Basketball Team 58% Debate Team 50% Tennis Team 80% Golf Team 67% Track Team 46%

All officers of the Junior class that were elected are members of the Theta Tau Fraternity. A Theta Tau heads the senior class. At the recent election of officers of the Anderson-Carlisle Society, two able Taus were elected to both available offices. The Glee Club, which has been extremely active this year, was until recently almost entirely composed of Taus (7 out of 9) and now we have a representation of 7 out of 12 students.

The members of our Fraternity have also proven themselves in the acting department. We are very proud of Booths and Barrimores like Cloudy, Lamphere, Dorman and Art Morris. If we can keep up this excellent prestige fellas, we will "go places".

Our annual Echo Lake party is on the doorstep now. May 7 is the big day. Once more we will be able to unite in great brotherly spirit and true to Theta Tau traditions we will also part in like manner. Let us all attend it!

"Sir, the enemy are before us as thick as peas."
"All right, shell them!"
Then it's there in the light of your fire burning bright
With its never ending glow,
We'll replenish our glasses and strike up a slave
To the glory of old Sigma Rho.

GRADUATING SENIORS
by R. Wayment

GARY MITTON: Gary has signed with the Cerro de Pasco Company which is located in Peru and he is assigned as foreman at the Parasanga Concentrator. From all the information Gary can gather, Cerro de Pasco is quite a place. It is located about 85 miles NE of Lima, Peru, at an elevation of 14,200 feet and has a population of approximately 20,000. Being located in the center of the ancient Inca empire lends itself to many interesting explorations. Housing and school facilities are excellent says Gary and incidently the trout fishing is supposed to be out of this world. The only thing Gary doesn't like is the high altitude.

Gary, and his wife Betty, and their three children, Dale, Jim, and Ray are planning on leaving Butte on the 20th of June. They will enjoy an all expense paid flight from here to Lima with an overnight stop in Chicago and layovers in Miami and Panama. They believe it will be a very enjoyable trip and are eagerly awaiting take off time.

Gary hails from Pocatello, Idaho, and his wife from Blackfoot about 25 miles North of Pocatello. He transferred from Idaho State College at Pocatello to M. S. M. in 1952. Gary is majoring in Metallurgical Engineering with a Mineral Dressing Option. He has worked at a number of different jobs while attending school, all of which were a benefit to him as far as furthering his career. A few of the jobs he had were with the Bureau of Mines at the School, mining for the A. C. M. Co., as a lab assistant at the School and various odd jobs for several different companies. This follow is apparently very capable. He played basketball with the school team for a year, is an active member of the Anderson Carlisle Society and belongs to the Theta Tau. He is planning on eventually matting an MS and PhD in Metallurgy. Good luck Gary, I'm sure you'll make it.

YOUR CLUB IS
by R. Foster

THE ANDERSON CARLISLE SOCIETY

A meeting of the student members of the A. I. M. E. was held Wednesday, April 20, 1955, in the Met. building, Chemistry Lecture room, for the election of officers.

Godfrey Howard was elected president of the society to succeed Fred Owsley and Bob Dorman was elected Secr.-Treas., succeeding Rod Foster. These men have taken their offices and will preside over the joint meeting to be held in the Petroleum building, May 5, 1955.

Following the election, two interesting movies were shown, "The New Frontier", which was related to the oil business, and "Copper in So. America", explaining the development of a low grade ore. After the movie coffee and doughnuts were served.

Remember the joint meeting May 5, and everyone please turn out for it, it should prove to be very profitable.

GLEE CLUB

The Glee Club met Tuesday, April 26, for a practice session, preparing for another public appearance, Sunday May 1, at the Baptist Church here in Butte.
The Coeds had a froshmen meet Tuesday evening, and all who participated were served chili and coffee. By participating is meant those who went into the pool and swam across—or were helped across. Have a nice time men?

The Coeds also wish to extend their thanks to Dr. McVannis for his assistance.

STUDENT WIVES

BY E. Wayment

The Student Wives are having their annual dinner honoring the senior wives at Lydia's on May 11 at 7:00 P.M. One dollar will be paid on each plate. This is to be taken from the Treasury. This should be great fun and all those who wish to attend and have not signed up are requested by the President to contact either Bonnie Shurtz (Ph. 2-6480), Delores Dorman at the Vet's Housing or Helen Fleming at the Residence Hall.

Several of the Student Wives are also going to serve a Dutch luncheon at the joint meeting of the Anderson Carlisle Society and the Butte section of the AIME on May 12. These include Edith Wayment, Delores Dorman, Helen Fleming, Betty Milton, June Body, Jan Link, Marion Hurda, Fran Nower, and Carol Weber.

COPPER GUARDS

by B. Loucks

The Copper Guards is the service organization on the campus which strives to be present whenever there is any work to be done, such as putting on dances, selling and taking tickets at athletic functions and the like. It is a sophomore honorary fraternity with members chosen late in the freshman year by the faculty and outgoing members.

The present year's officers are Bob Loucks, Duke; Leonard Darsow, Scribe; Don McCoart, Chancellor; Art Talpt, Expansion; and Sam Worcester, Recorder. Other members are Allen Westerdahl, Alan Kerr, Harry Steeves, actives, and Dick Benshart, Gene Penny, Gene Lanier, Tom Minette, Dan Urback, Bill Travis, John Bauer, Tom White, Larry Triebert, C. C. McNeil, Barry Hanson, Aurelio Madrazo, Kenn Rapp, and Dave Place, pledges.

A delegation was sent to the National Intercollegiate Knights Convention during April 15-17 at Pullman, Washington. Important business was undertaken which benefited our local chapter.

At present, plans are under way for M. Day dance and lunch.

CADENCE COUNT

by R. Westerman

Air Science III cadets are preparing for the annual sojourn to summer camp. The "camp," which lasts for four weeks, is held at various Air Force bases about the county. The cadet receives transportation expenses, and is paid the regular basic airman's pay. Cadets are sent to various camps in accordance with their rating; that is, potential pilots are sent to one base, cadets with a technical rating are sent to another. The A.S. III cadets have been assigned to their bases, summer camp clothing has been issued, and briefing by the upper classmen is in progress. Should be quite an experience.

Good news: all A.S. IV men graduating this year will definitely receive their commissions. Good luck, fellows!

In spite of the poor weather and practice conditions, the cadet review is definitely scheduled for 7:00 P.M., May 18. The awards to be presented at this time are on display in the AFROTC office. Drop in and look them over.
A cadet has a pressing question I'd like to have answered concerning ROTC, let me or an editor know of your problem. I'll endeavor to have straightened out in this column.

PERSONALITIES AND JOKES
by B. Huber

ENGLISH DEPARTMENT------

In this column I am going to prove how really weird some common every day sayings are. First, take the phrase, "Don't shoot until you see the whites of their eyes," which is undoubtedly an understatement. In one test, several men were selected and divided into two sides. Of the eight men that were given this command, two had normal sight, two were far-sighted, two were near-sighted, one was cross-eyed and one had the pink eye. The other side started to charge these men at a given command. As the command, "Don't shoot till you see the whites of their eyes" was given, the far-sighted men opened fire at 80 feet, the normal sighted men opened fire at 40 feet and the others were virtually perforated by the charging bayonets. MORAL--"Shoot first and fast, and if you don't succeed, keep shootin'!"

RECORD DEPARTMENT-------

For Dick Banghart---
"He's in the Jailhouse Now"

A NEW ONE????????????

Tau---A friend of mine fell out of an air plane yesterday.
Rho---How unfortunate.
Tau---But there was a haystack below.
Rho---How fortunate.
Tau---But there was a pitchfork in the haystack.
Rho---How unfortunate.
Tau---But he didn't hit the pitchfork.
Rho---How fortunate.
Tau---Of course he didn't hit the haystack either.
Rho---"------------------."

QUOTABLE QUOTES???

She was built like a giraffe--all neck and no tail.
CONVOCATION

ATTEND THE CONVOCATION ON MONDAY, MAY 2, IN THE MUSEUM BUILDING. CANDIDATES FOR STUDENT BODY OFFICE WILL BE INTRODUCED. LET'S BE THERE!

A.S.S.M. ELECTION CANDIDATES

The following names have been turned into the Student Council by the Theta Tau Fraternity, Sigma Rho Fraternity and Independent Party as their candidates in the forthcoming all school election on May day. This election result is the governing body of the Student Body at the Montana School of Mines for 1955-56.

SIGMA RHO FRATERNITY

President: ......... Edwin J. Westerman
Vice President: ....... Theodore Bertholote
Secretary: ............ Sam Worcester
Delegates: .......... Richard O. Sizemore
........................ George B. Huber

NOTICE

1. All seniors are responsible for their crew members.
2. All lower classmen will report to their senior crew leader.
3. The Campus Group (Crews 1 to 6) will report at 8:00 A.M., Wed., May 4.
4. The M Group (Crews 7 to 26) will report to the base of the M at 8:00 A.M., Wed., May 4.
5. Senior leaders will take roll and report all absences.
6. Copper Guards and Coeds are in charge of the lunch to be served at noon.

JAG: Hear about the rabbit that died and went to heaven?
AIM: No.
JAG: Well, he kept hoppin' around and around until an angel just got furious and told him to stop or she'd turn him into a big goon. The rabbit kept hoppin' around however, so—-you known what the moral of the story is, don't you?
AIM: No.
JAG: "Rare" today, "goon" tomorrow!
