HALL COUNCIL SEATS NEW MEMBERS

At the close of nominations Feb-

uary 13, the Residence Hall Coun-
cil declared the three men nominated
delegates. The new members of the

governing body are Dan Bray, Gus

Coolidge, and Al Walkop. Big Tim-
ering to the future

Boy, a sophomore from

Bangkok, Thailand,

is a potential engineer. Don was

here in 1952-53 as a freshman before

leaving to spend six months with

the U.S. Army. Gus Coolidge, a junior in petro-

leum engineering, comes from Sun-

burn. Gus is an active man on cam-

pus: he has been playing bas-
ketball with the Miners, and he is

the newly elected Regent of Theta

Tau。

A Walkop, you will remember as

the plumbing flushback of the Ordi-

gers last fall. All come to MSM

from Philadelphia to major in min-

ing and is a member of Sigma Phi

fraternity.

The new members joined Gordon

Parker, Richard Roberts, Dave

Johnson, and Dick Banghart in the

regular monthly meeting held Feb-

uary 18. With a disappointing num-

ber of students present, the Council

discussed various hall problems. The

students present agreed that the

RHC should work for the early pur-

chase of a television set to supple-

ment the limited recreational facili-

ties.

Dickeman Elected Marshall

A meeting of the senior class was

held at 12:30 P.M. Thursday, Feb-

uary 20, to discuss the program for

M.E. Day.

Diane Dickeman was elected mar-

shall and is now making plans for a

very elaborate day.

Plans are also being made for the

senior class to attend the A.L.M.E.

meeting in Spokane, Washington

April 17, 18, 19. It was announced

that special student rates will be

available to those seniors attending

the conference.

There will be another meeting for

further discussion of these projects.

Miners Win Final

Home Game 76-52

Hitting the basket with great accuracy in the first half, the Montana Miners defeated the Northern Lights of Havre. February 21, by a 76-52 score. In winning the second conference game of the season, the Orediggers compensated for a previous loss in Havre.

The Miners started fast in the second period, breaking into a 15-

point lead. Coach Simnoch altered reserves freely throughout the rest of the game. The score at halftime was 20-16.

The second half was rough, with both teams scoring in spars. A to-

tal of 65 personal fouls were called.

For the first time, ten Miners broke into the scoring column. Cen-

ter Ron Rickman led with 21 points, including ten field goals. Following

were Mike Freebourn with 16 and Mel Bennett with ten. Grab topped the

scoring for the Lights with 12.

The Orediggers showed great im-

provement from the first of the season and, under the guidance of

Coach Ed Simnoch, should be in strong contention for the confer-

ence title next year. The victory over the Lights was due, in a large part,

to a tighter defense and greater

accuracy from the field.

EDITORIAL

A short time ago, Daj Twisting of Bangkao, Thailand, gave an interesting talk on the customs and beliefs of his country. The program was open to all students, but only two, both members of the International club, were present. It seems too bad that a person who will spend thirty to forty hours a week in classes and labors, only to pass up an opportunity to learn something about the most important subject in the world—the human race.

We hope that in the years to come that we may rise above the test-grade and drill level of engineering and become involved with the higher phases—management, planning, and public relations. To do this, we must also become acquainted with the broader aspects of our field which have their roots in psychology, history, political science, anthropology, philosophy, literature, and art. No technical executive has knowledge restricted entirely to engineering principles.

There seems no doubt that the up or out for an hour or two the next time a seminar or other type of educational program is presented and relays for a while and learn.

MINES PROFESSORS ATTEND MEETS

Several years ago the alumni association of Mines had tried this project but it was not successful. It is hoped that these difficulties will be overcome.

While the husband entered the store, his pencil was not to be found. He asked the secretary where his pencil was. She requested, that if he shaved he was turned into an urn. She then requested, that if he shaved he was turned into an urn. She then exclaimed, "I'm a busy man— which ear?"

When the husband gasped the mother, "And I've heard all the arguments for it."

Well, you know those aptitudes that we have shown up today, and it's sure a good thing I own the company.

Civil Service Seeks Engineer

Applications are being sought from qualified engineers and scientists for positions at the U. S. Army's Rocky Mountain Arsenal and Army Ballistic Research Laboratories at Aberdeen Proving Grounds, the U. S. Civil Service Commission has announced. Rocken is prepared to test the control center of all activities in the United States. Interested candidates should have training in test-weapon systems. Employment in engineering, research, and development is available in fields which require the highest levels of scientific knowledge and training.

The Aberdeen Proving Grounds is the only federal laboratory which conducts research and development in test-weapon systems, and the highest levels of scientific knowledge and training are required in fields which require the highest levels of scientific knowledge and training.

There is a need for qualified engineers and scientists, with specialization in test-weapon systems, in fields which require the highest levels of scientific knowledge and training.

Any students who are interested in applying for these opportunities should contact the Civil Service Commission at its offices in Washington, D. C., or through the nearest Federal employment service.

The Inquiring Reporter

Question: "If you think of the proposal to start the first semester a few weeks earlier, would you accept it?"

Answer: "Zipperian, senior, "No, I don't think it should. If the football season was not going to be affected, it could be accomplished by simple means."

A. K. junior, "It's a good one."

Dave Rasmussen, junior, "I'm in favor of it."

Frank Wilson, senior, "I think the first semester were over by Christ-"me-gett."

Charles L. Chitty, junior, "A good idea."

Jon R. senior, "I don't know of anything not to be going here by this time."

SIGMA RHO NEWS

by McKinnon

The Sigma Rho chapter invites an invitational dinner dance on Monday, April 16, at the Hot Country Club.

Cringle, the Sigma Rho officer, named Benny was walking into an urn.

"I've heard all the arguments for it."

New Lights Top Miners, 59-47

The Northern Montana Lights have been playing most of the games with what had been their second team, while the third team, contended Montana School of Mines 59-47 Friday night in a Montana Collegiate Conference basketball game.

Four of Northern’s starting five were dropped from the list this week for unauthorized participation in an independent league. The fifth, Jack Rounds, injured his knee early in Friday night’s game and also did not play the rest of the contest.

Northern pulled away midway in the first half and led 29-21 at the intermission. The Band commencement court came no closer than six points thereafter.

Guard Erland Grubba scored 12 points for Northern while center Rickman had 12 for Mines. Forward Jack King and guard Rickman were scoring for Mines with 10 points each.

3. Minors and Engineering Forms must be filled out on each study sheet by examining physician prior to taking the training, in which form and blank forms may be obtained in the office of Dr. E. McCullough. Arrangements for the examination have been made through the Registry Office and will be financed by the Student Health Fund. The examination will be conducted in a group of doctors at the St. James Hospital beginning at 9:00 A.M. Monday, February 27. All students must report to the hospital at the time for the examination and will be excused from class until the examination is completed. The examinations should not require more than one hour.

First-Aid Training, which is required of all sophomore engineering students, will be conducted in the School of Mines gymnasium beginning Tuesday afternoon, March 4, from 1:15 to 4:00 P.M., and will continue through Friday afternoon, March 7. Sophomores will be excused from all other classes during the period of instruction.

STUDENTS TRAIN IN MINE RESCUE

As a course in Mine Rescue Training, as required of all senior students, will be conducted at the Butte, Montana Mining Rescue Station starting Monday afternoon, March 3. The class will be divided into two groups, and the time for each follows:

1. Metallurgists and Geologists—March 3-8, inclusive.
