Students Elected to Officer Positions

President: Dennis Coyne
Vice President: Stanley Bosch
Secretary-Treasurer: Bob Applegate
Assistant Secretary-Treasurer: Marvin Smith
Assistant Secretary-Treasurer: Joe McHugh
Treasurer: Dennis Coyne
Assistant Treasurer: Stanley Bosch

doing a job like that." ,

Several Montana School of Mines students and two faculty members visited the National Reactor Testing Station at Arco, Idaho. Those under the direction of Professor D. W. McGlashan participated in the Nuclear Chemical Engineering tour on October 22. This group included D. W. McGlashan, T. J. Wright, and Johannes Dreyer. Those participating in the Reactor Engineering tour on October 29, under Dr. Vernon Coon, were: Robert C. Laughlin, B. B. Bjeletich, W. R. Byrne, William Cronin, E. J. Nicholson, A. C. Bigley, Jr. (The Anaconda Company), A. C. Bigley, Sr. (General Motors Western Operations, The Anaconda Company), and retired.

Mineral Club Selects Officers

The listing for officers for the Mineral Club for the fall semester are the following:

President: James Ug仁, secretary-treasurer; Stanley Bosch, vice-president.
Vice-President of Petroleum Engineering: Dennis Coyne, a resident of Montana. A group of students is planning to take a field trip to Arco, Idaho. Most of the large waste disposal installations of the future will be located in the States and Canada where it is believed a solid waste is likely to be more widely practiced than ever before, according to the Department of Defense.

The Montana School of Mines is planning to buy new machinery with their appropriation of $50,000. The new machinery will consist of a new machine, a new belt sander or grinder.

Applications are now available for the Navy's forty-seventh Air Force Training program, according to the Recruiting Office of the U.S. Atomic Energy Commission, sanctioned by the Navy Department. The mental examination is scheduled for December 12, 1959, and the deadline date for receipt of applications is January 31, 1960. After January 31, 1960, for the Navy's fourteenth annual competition.

One of the first plants visited was the Waste Product Plant. The experience of waste disposal is being gained by designing and operating a facility for the disposal of solid waste. This facility is located in the states of Idaho, Montana, and Wyoming. The first plant visited, located in the United States, is the Waste Product Plant. The second plant visited, located in the United States, is the Waste Product Plant. The third plant visited, located in the United States, is the Waste Product Plant. The fourth plant visited, located in the United States, is the Waste Product Plant. The fifth plant visited, located in the United States, is the Waste Product Plant.
Editorial

Leo Tolstoy, in his short story Three Questions, concluded that the best time to act upon any consideration is the present, "for no man can be sure he will ever have another opportunity.

This is a lesson members of the ASSM will do well to heed. By acting now the students of Montana School of Mines can gain participation in the Student Union Building; by delaying, the students can lay control directly into the hands of Dr. Koch and the administration.

More pertinent than the situation as it now stands, Construction on the SUB is proceeding rapidly, but, from all appearances, no one has given much serious thought to the problems which will arise upon its completion. One thing, that is, except Dr. Koch and other school officials. If opinions or proposals are forthcoming from the students in solving these same problems, the result will be inevitable. Dr. Koch will have no other alternative than to proceed upon his own initiative in setting up SUB rules and regulations.

What can be done to correct this situation?

First, each individual student must concern himself with the following questions:

1. What rules of discipline will be necessary in running the SUB?
2. To what particular organization will the floor space go?
3. Who will handle the custodial duties?
4. Who is to occupy the building's apartment?
5. Will it be necessary to create a new student body office, that of Student Union Building?

Second, the members of the ASSM must make their views on these and other questions public. The easiest way to proceed upon his own initiative in setting up SUB rules and regulations.

First, each individual student must concern himself with the following questions:

1. What rules of discipline will be necessary in running the SUB?
2. To what particular organization will the floor space go?

5. Will it be necessary to create a new student body office, that of Student Union Building?

Second, the members of the ASSM must make their views on these and other questions public. The easiest way to proceed upon his own initiative in setting up SUB rules and regulations.

Third, the Student Council itself must, in plain words, "get busy.

 committees to investigate the above questions, the easiest way to proceed upon his own initiative in setting up SUB rules and regulations.

In regard to gaining self-management of the Student Union Building, the student's position can be likened to a situation encountered in wedding ceremonies: "Speak now, I'm going home."

A Word from the President

Last year the State Musicians Association passed a resolution which stated that no less than six musicians would be allowed per band for all dances held at the Montana School of Mines. However, student council representatives attended several "Assembly" meetings and expressed that such a minimum was financially untenable at the present time and would greatly curtail the number of dances which could be held during the school year.

After due consideration, the Musicians Association voted, at a meeting held October 21, to temporarily remove the six-piece requirement until such time as they feel the financial situation has improved sufficiently to warrant the use of six pieces.

At the present, the minimum has been lowered to four musicians, with the understanding that additional students may play in larger dances such as the Junior Prom. The temporary suspension of the six-piece requirement should extend at least through November.

Incidentally, the student council hopes that with graduation of some student musicians, the council will then have available for the school an extra student to add to the band. Should the council be able to secure a student to add to the band, the council will then have the option of including the student in the band at any time.

The following questions is a present. "You Pay Less for Cash at . . ."

LITTLE MAN ON CAMPUS

Beat Carroll!

The Mines will be host to Carroll College Saturday, November 7. At 7:00 o'clock, in Ntriangle Stadium they meet in their usual hard-fought football game. There, in the evening, the Freshman Class is sponsoring a dance at Memorial Hall for the student body and the visiting Carroll team.

The Oregadians stand a good chance to win Saturday's game and if they are backed up by the whole student body, their chances of winning will be even greater. Therefore, the whole student body, alumni and faculty are urged to attend the game.

Also, everyone is invited to attend the dance.

'Matchmaker' Delights Mines Audience

"The Matchmaker," a hilarious farce by Thornton Wilder, was played before the largest house by the touring Montana State University Masquers at 8:15 p.m., Tuesday, October 20, in the Library. Montana College at Montana School of Mines.

For their sixth annual tour, the Masquers, a student drama group at the University in Missoula, presented the famous musical play, "The Matchmaker" which delighted audiences throughout the state. The play was presented on Saturday night, November 7, in the morning, with the fervor of the School of Mines Audiences from coast to coast via television.

Cam Brown (44) goes high in a vain effort to knock down one of the many Bulldog passes which filled the air in last Saturday's Miners-Western game. Other Orediggers in the action are: left to right, Stan Bosch, Dave DelPaggio, Bill Tiddy, Gay Kravik, John Walsh, and Brad Bilyeu.

Mines Beaten By Western

The Montana School of Mines Orediggers were beaten for the third time in as many weeks as the Bulldogs from Dillon defeated the Miners 46-6, in Naranache Stadium last Saturday afternoon.

Paced by Murphy and Barber, between them they scored six touchdowns, the Bulldogs were un-touchable for the Orediggers. Mur- phy scored four touchdowns, Bar- ry scored two and placekicked four added points.

The undermanned Oredigger scored early in the second half with Dave Del Paggio plugging through from the eight-yard stripe for the Miners only score. The Miners have scored in every game this year, compared to last year when they never scored.

Kelley Hemmert stayed on top of the ground gainers by picking up 73 yards in this game to make his average 100 yards in three games.

If you have five dollars in your pocket, you can buy one of these guns at the Montana State University College of Mines and other universities.

The police have been asked to watch for the gun buyers and report their activities to the authorities.

The gun is a small, pocket-sized weapon that can be carried in a coat pocket or in a briefcase.

The gun has a trigger that can be dis-armed by a simple mechanism.

The gun is made of metal and is completely safe to carry and use.

The gun is easy to use and can be fired with one hand.

The gun is available in a variety of colors and designs.

The gun is sold by the university's security department.

The gun is popular among students and faculty who want to defend themselves from dange-rous people.

The gun is illegal to carry in public places and is subject to a fine of $500.

The gun is illegal to carry on campus and is subject to a fine of $1000.

The gun is illegal to carry in any state or country and is subject to a fine of $2000.

Not Always Bad

Newspapers, magazines, radio, and T. V. always emphasize the wrong that is done by the teen-ager but no one seems to see the least bit of the good that teenagers are accomplishing. This is why it is necessary to come to the conclusion that all teen-agers are bad and that the younger generation is "going to destruction.

The statement has been made that five per cent of our juveniles are delinquents. Analysis of this figure shows that today’s adults were young many new rules of conduct have been adopted and, therefore, a yardstick of what is delinquent must also be adopted.

The largest of crimes is included in the "delinquent five per cent". One can’t forget that when they were young they also committed many small crimes. In most cases these crimes were not considered delinquent and were not even reported. Today such misdeeds are reported and contribute to the "delinquent five per cent."

Teen-age crime rates are going up because there are many more teen-agers in America today. The population is increasing and, therefore, the number of "bad apples" is also increasing. Before you become alarmed over teen-age delinquency be sure to compare today's situation to the one of the past.

Another contributing factor is the increase in the number of people who are born in times of war, members of the family and community. The teen-ager likes his new rules in life and most of them are doing their best to live up to their responsibilities.

Some children have regarded their new freedom as a license to get away with murder. A recent study of this situation led to the conclusion that in most cases this results from a poor home environment and from the fact that many of these children are not being taught to obey rules. Parents too should be considered members of the family and community.

But, still there wasn’t an air of permanency. That summer the country was a series of gulches which extended down to Silver Bow Creek. A miniature river flowed across Park Street about where the Bur’s Store is located. This was later papered in.

Underground mining was brisk. Many homes, all of log cabin variety, were built.
