Raab to Gab at Confab

The International Club met on October 8th and 15th and November second to plan the activities for the year. The officers are Jaravid Ahid, President; Bevrent Gallop, Vice-President; Joanie Sigurdson, Secretary, and Linnea Favero, Treasurer. Professor Ralph Smith is the advisor.

One of the most active organizations on the campus, the INTERNATIONAL CLUB furnishes a common meeting ground for students from four corners of the earth. First Row (L to R) D. Pachas, Alvi Mant, Xhib Roab, Smith, Favero, Benardis, Antuna, Woolcott, Myung, Kahn, Cadwell, and Faculty Advisor; Professor Ralph Smith.

FRANTIC FROST

SHOVE ASIDE the piles of notes, books, empty coke bottles and your circuit copy of English homework and let me weep on your shoulder. I, too, am doing the presently unheard of studying:

To be truthful, I have studied before in high school-how to chew gum nine different ways without the teacher seeing me, the art of using a shot gun, a great hunting technique, and how to smoke internally while in class. These intellectual viles for some reason, however, do not seem quite sufficient in my pursuit for good grades in college.

I am all for studying and endeavor in full, but we, as freshmen backbones of the university, should not let studying dictate our social and extracurricular activities.

The influence of hitting the stacks of text books we transport into class with all my books stuffed into my official boy scout pack. A chance to rest and mingle with their friends. The uppity classmen don't have to rub it in by their snickering and pointing of their nasty little fingers, and snorting, "See that thing that looks like a loaded camel?"

It just might be that Elmo, whom you stole from a circus, somehow got out of you dorm room where you were keeping him, or an old uncle who is a farmer is visiting you, with his royal caravan or any one of a number of obvious reasons like that.

From now on, I'm going to be sophisticated and come treading into classes with all my books stuffed into my official boy scout pack. Subversive organizations are the biggest obstacles toward studying. One such group has the ridiculous theory that studying can be fun.

SOPHOMORE CLASS OFFICERS

L. R. E. Robert E. Johnson, Secretary-treasurer; William C. Pickard, Vice-President; Michael Keegan, Representative; Peter Atkinson, President.

Mines Alumna Dies

Mrs. Josephine Benardis, one of the two daughters of the women to ever graduate from Montana School of Mines, died Oct. 31 of a heart attack. Mrs. Benardis a graduate of the class of '04, received her degree as an Engineer of Mines. She had been residing in Los Angeles, California.

The other woman graduate of '04, Mrs. Isabel L. Stevenson, died in 1936. She had also received her degree as an Engineer of Mines.

One of the most active organizations on the campus, the INTERNATIONAL CLUB furnishes a common meeting ground for students from four corners of the earth. First Row (L to R) D. Pachas, Alvi Mant, Xhib Roab, Smith, Favero, Benardis, Antuna, Woolcott, Myung, Kahn, Cadwell, and Faculty Advisor; Professor Ralph Smith.
A Wee-Small Crusade

Instead of rebashing the SUB, trodding lightly over Dr. Justice's grave until he is no more, the students have come up with a crusade that is of great importance to mankind in general and to Montana School of Mines students in particular: food, and women.

First of all, the students who attend the dances. Third, the nurses might reciprocate our affections. Third, the nurses might reciprocate our affections.

Second in our wee-smallest crusade, consider the woman situation at Montana School of Mines. According to the director, there are 4.9 females to each 100 males.

Teachers, look at it this way. What work or concentration can you get from the student whose stomach is a growling beast, the student who sits in class watching his fellows streaming down the walls toward their lunches? Admittedly, not everyone can be at the head of the lunch line, but it is only polite to give your students an equal chance. An attitude such as this is probably the best way to make a man's heart through his stomach.

Second in our wee-smallest crusade, consider the woman situation at Montana School of Mines. According to the director, there are 4.9 females to each 100 males.

A special "thank you" is extended to the three MSM students: Jack Delaney, Jack the Jag, and Michael Maddocks, who donated blood for the first semester.

Students Donate Blood

A special "thank you" is extended to the three MEM students: Stephen Dahlgard, Robert Utter, and Michael Muckenroth, who donated blood for the first semester.
Orediggers Defeated by Carroll Saints

Carroll College Saints ground out a first quarter touchdown to take the lead against School of Mines eleven; the Orediggers exploded for long gains and went on to victory over their traditional rivals by a score of 31-6. This was the final game played.

The Saints scored in the first three quarters with two scores made in the first and second and third quarters. Carroll got the first score in the opening period by grinding out 72 yards in 14 plays, Halverston of Butte's routine punt moved the ball all the way back to the 3 yard line, with the exception of Kelley Hemmert, who in the only senior on the squad. They improved considerably over last year when the Orediggers failed to score. This year they scored in every game and at times throughout the year they have played some exceptional football.

The Orediggers' lone score came on a Saint fumble that was scooped up by Kelley Hemmert, who scampered 38 yards for the Mines touchdown. This game was won by a sturdy Carroll and a poor Orediggers.
Hey man! Have you ever wondered about the scene in San Francisco, around North Beach or venus? Never have, but I can tell you it's the beatnik scene, the beatniks, who don't dig benga, tune arcane is intense, the beatniks are hip, it's a do-it-yourself lesson in How You Can Achieve An Offer Intellectual. It is just a little in- formation and a group that seems to have all America guessing.

The American beatnik is a species of homebodies, a species who come into existence during the last two decades. For beatnik or beat- chok, depending upon sex, despi- the name which the public has pinned on him and would rather be called a beat.

Beats are primarily found in the South-West coast region of the United States, with the largest part of their mass being centered in San Francisco's North-Beach and a little Los Angeles beach community of Venice. However, the scene is spreading out and away as far as New York City, and in many colleges and univer-

They say “Home is, however, everything,” and the beatnik's the most (humble, that is), they are unique men who have the habit of being without furniture. It serves the need for just about anything besides bat- tery, but it seems you can get one, and you have enough for about every two weeks or if you ever decide to take a vacation.

Beatniks seem to have little de- sire for food but make up for it in books and records. That has and does.

The beatniks are seen to be the second of the beatnik population classify themselves as writers, musicians, artists, and of which the end of the road, the writer of fiction, poetry, and criti- cism, the writer of literature, every liter- ature can ever be more than sec- ond. But they are, like the rest of the world, a coherent view of the world can give and how it comes to ignore the process of tradition and draws a connection with the literary past. As it is, writers like Kerouac make mistakes as if they were discover ed.

According to Dr. Francis Reg- ney, staff psychiatrist for the Van-
