This Book is brought to you for free and open access by the Student Newspapers at Digital Commons @ Montana Tech. It has been accepted for inclusion in Amplifier (1955-1977) by an authorized administrator of Digital Commons @ Montana Tech. For more information, please contact sjuskiewicz@mtech.edu.
Six students at Montana School of Mines have been notified of their inclusion in WHO'S WHO AMONG STUDENTS IN AMERICAN UNIVERSITIES AND COLLEGES. Those selected (from left to right), are: Douglas H. Woodman, Cut Bank; George A. Grandy, Butte; Kelly P. Hemmeter, Butte; Richard R. Vencelette, Billings; Mrs. Marva Powell, secretary to the Dean; Donna McAuliffe, Robert U. Reiter, Butte; and Robert W. Hoy, Butte.

Sigs Rho Has Frolic

On Tuesday, November 14, members and pledges of the Sigma Rho fraternity invited the student nurses of the St. James Nursing School to a combination lay-out and barbecued. The outing, which was held at the Columbia Hills Club, was very much enjoyed by both groups. Sigma Rho got back to business, however, on November 19 and held its regular business meeting. The meeting was devoted to the discussion of the coming Christmas Dance, which is an annual fraternity affair. From all indications the dance should be an enjoyable one.

Two intramural basketball teams were also formed at the meeting.

Schoolroom Progress To Be Exhibited

Sponsored by the Henry Ford Museum and the Montana Power Company, the SCHOOLROOM PROGRESS U.S.A., the traveling exhibition of educational progress, will be in Butte on the following dates:

Thursday, Dec. 3, 10 a.m.-7 p.m.
Friday, Dec. 4, 10 a.m.-7 p.m.
Saturday, Dec. 5, 10 a.m.-7 p.m.
Sunday, Dec. 6, 1 p.m.-6 p.m.

This exhibition, which will be shown in two railroad cars at the Northern Pacific Depot on Main and Hill Streets, will depict the advances which have been made in American education in the last 100 years.

"SCHOOLROOM PROGRESS U.S.A." has three basic purposes: to encourage an ever-increasing interest on the part of young people in the things we are teaching as an instruction; to pay tribute to the contributions of the American teacher; and to increase interest in our schools and school facilities.

Nile and Hall Awe Audience

On Wednesday, November 16, an interesting and informative conversation was held in the Library-Museum building. Earthquakes in general and our own Madison Canyon quake area were the subjects spoken about by Dr. D. C. McAuliffe, Mr. Hall.

SIGMA RHO HAS FROLIC

Mr. Hall, in his opening remarks, said, "Magazines have claimed that the great mass of people do not know very much about earthquakes. I feel that the Madison Canyon area is considered unique in Montana because of the number of quakes in the area. I think that the students in this audience are interested in a subject that is related to their lives."

Mr. Hall then proceeded to tell us about the Madison Canyon area. He talked about the locations and the general information about the area. He then talked about the earthquake that occurred in this area. The audience was amazed by the magnitude of the earthquake and the damage it caused. Mr. Hall ended his talk by encouraging the audience to learn more about earthquakes and their effects.

What, an R.N.!

Helen Handlin, one of the women members of the student nurses' organization, presented a lecture entitled "A Classification of Epileptic Encephalopathies" at a Geology Department seminar held November 26, on the campus of Montana School of Mines.

In his lecture, Mr. Fox explained how, "Classification in any scientific field is of vital importance," and he then added on to ask, "Are the present classifications of epileptic encephalopathies sufficient? Are they the best possible?" Later, in the course of his talk, Mr. Fox answered his own question with, "No, there is tremendous room for improvement."

In concluding epileptic encephalopathies, Mr. Fox discussed the following sub-topics: First, the justification of a classification; second, the purpose of classifying epileptic encephalopathies; third, the variables of which classifications are based; and fourth, the evolution of contemporary classifications.

The classifications now in use include those of Rasmussen, Schonheider and Lindgren's categories, each of which was written in 1942. "There is a good glossary, but could profit by certain restrictions pertaining to certain diagnostic categories," Mr. Fox said.

Mr. Fox graduated from the University of Idaho in 1955, and then entered the service, serving three years in the U.S. Marine Corps as an officer. At present he is working on his thesis, "Geology of Mill Creek Basin."

Marvin Daly or St. Patrick? To the Editor:

To your recent campaign for improving conditions for foreign graduate students on the campus of MSM, we must add the following issue.

Students, especially those reading in the dormitory, are unwilling to use the gym because:

1) The gym is locked
2) A window is broken
3) Boys Central is practical

We are naturally all for the variety practicing, but the other two seem unrolled. Is it OUR gym. Isn't the gym the place every day of the week for our use at any time. We can no longer use from the dorm, who is willing to take the responsibility, have a key to the gym? Is it with MSN, at the least that has given up their space on the campus for the establishment of the facilities in their spare time. Perhaps a few of you would direct your main point of controversy for the sake of our gym by a local parochial school every afternoon. Not only are students, who wish to use the gym in their spare time forced to leave by the high school coach, but also many attend the evening physical education classes, cost money to attend, find their time valuable, ask whether other school states can make use of their basketball floors. So, please, since the student council let us know it's a problem immediately so that the preservation of our gym by a local parochial school every afternoon. Not only are students, who wish to use the gym in their spare time forced to leave by the high school coach, but also many attend the evening physical education classes, cost money to attend, find their time valuable, ask whether other school states can make use of their basketball floors. So, please, since the student council let us know it's a problem immediately so that the preservation of our gym by a local parochial school every afternoon. Ans.: Huh?

Dear Editor:

In regard to your editorial "Wee Frum Butte" of December 14th issue, we feel you are a little bit off allowing the social aspects in the city of Butte. We feel that our social life is very unique in that it offers fellowship and companionship. This was not so in the past. We of our student body, and it is estimated that only victories are moral, the gate receipts are nil, and a Western and Eastern go the limit in handing out athletic scholarships are offered; no active program to build up our athletic program by giving athletic scholarships. In the words of Coach Ed Simonich, "As the situation stands presently, it seems to me that the future student body will no longer be able to compete with teams like Western and Eastern. We will either have to build up the student body and get athletic scholarships or by some other means, or drop from intercollegiate competition in favor of purely intramural sports, especially as concerns football."

Assistant Business Manager L. M. FISCHER

MARI SCHMALZ

Co-ed Corner

Pictureed above in the vivacious Maria Schmalz, MSM co-ed and young blood of winter采矿. Her energy has contributed notably to countless activities on campus as an immeasurable factor in spontaneous recreation in the suite of informal gatherings with her classmates. Oddly enough, Maria Schmalz has been particularly zealous in those areas of activity which are normally reserved for the male members of the student body.

Maria Schmalz is a native of Broken Horn, North Dakota, and vigorously disputes any assertion that she has "gone native" since coming to Montana. Cross-country powerhouse, running, she insists, is as popular a sport for North Dakota girls as football and is an honorary member of the local softball team and a member of the National Sport Association.

This reporter was gratified in hearing this assertion, and conducted the following interview with her:

Ques.: Maria, do you feel that the United States was justifiably, under the Eisenhower Doctrine, in sending troops into Lebanon?

Ans.: Huh?

Ques.: Do you have any comments on the Co-ed Club?

Ans.: Maria, what are your expectations for the Co-ed Club?

Ques.: Oh, you mean like hobbies . . . let's see . . . . I think rock and roll music is keen, and I love to dance. I guess I like Kookie, Ricky, and the rest of the people (lol, that order).

Ques.: Do you have any comments on the Co-ed Club?

Ans.: I think some of the other girls are very different. They're much like the way of the world to my hair; and do, they say I'm old fashioned. I know they just envy me because I'm 18. I'm in my senior year, um I used to have trouble finding fella's, but now I've always had one. I think MSM is Beautiful.

Maria Schmalz

Girl's father: "Young man, we turn the lights off around here at 10:00 p.m.

Boy: "That's O.K., sir. We won't be reading!!"

 allegro

Dear Sir:

I am quite disgusted at the failure of the athletic department to support our hockey team. From what I have heard the players say, the equipment is awfully good; really, we have $200000 worth of equipment and a great lack of equipment. They are suffering from a lack of such a primary necessity so that we can't play hockey sticks! Repeated requests for them to improve conditions for the asking have so far brought no results.

I realize that last year our hockey team was badly defeated, but suffered from the same type of organization and lacked a good goalie. But our football team is defeated similarly. We need the equipment and get a chance to play.

There is a sizable Canadian element among our student body, and it is practically an adage that "To be a Canadian is to play hockey." With a core of North-Side butte, U. S. boys who would like to play and several players and a little support, Montana State should have a winning team in at least one sport.

A Disputed Yankee

EDITOR'S NOTE – Athletic department does not have any hockey sticks but no players.

Dear Mr. Editor:

I would like to remind, or inform you, that this is an engineering school, the paper that is supposed to inform and entertain us is FAILING!

I believe the reason for this failure is in the type of articles that are being printed.

The type of articles in the last few issues has been generally focused towards the general student class, the general student. People who are not engineering and its paper should be of such an opinion, the type of articles that are being printed.

Most of the people that are engineering students, have articles that are written for the professional student and it's criticism should be directed to the professional student. This is a college paper and not something that is intended for the general student.

Besides we have a few subjects that are extremely bitter to us engineering students, which are not provided in our profession and school.

THE MONTANA SCHOOL OF MINES AMPLIFIER
Page Two
Northwestern Wyoming Invades Orediggers Gym

The School of Mines basketball team will be in action tomorrow night and Saturday for their first two home games of the season. The Orediggers from Northwest College in Powell, Wyoming, will be the only home games until after the Christmas holidays.

The Orediggers will be trying to win their first game of the season against a Rocky Bear football team. The Bears are expected to be the stronger team in this contest.

Inside Intramural BB Is Underway

The Intramural Basketball program began on the 26th of November. The men’s team is currently leading the league with a perfect 8-0 record. The women’s team is also doing well with a 5-1 record. The league is divided into two divisions, A and B, with each team playing in both divisions.

Intramural BB is a great opportunity for students to stay active and competitive while enjoying friendly competition with peers.

LITTLE MAN ON CAMPUS

How to Ski on the Hill

Your problems are mine. The fortunate skiers of MSM and everyone else for that matter, have this year, a source of information and advice on any phase of skiing, from drinking from a wine skin to taking the headwinds straight on the ski. Be it trying on those blasted bearder or sharpening your latest racing technique, I shall give you pointers and tell you what you are doing wrong.

Last year I perfected wedeln (reverse shuffle) and found very little challenge in it. No wonder Tanzi Balier is the king of wedeln, he looked at it from a scientific or an engineer's viewpoint. All you have to do is learn to bump on a rock-n-roll beat.

A few years before everyone was talking about the French technique or runde, which of course I had already mastered. It is basically parallel skiing with the backs of the skis out of the snow off the ground. The technique is simple, just jump, rotate, and hope for the best. For those of you who are interested in the French technique (skiing) and want to condition yourselves during the summer months, I suggest entering pogo-stick marathons.

I could tell you about the Alp-0-Ho, I'll have the ween high polnt;man for Northwest with he looked at it from a scientifi-

ALL CONFERECE

Kelley Hemmert, Captain and only senior member of the 1959 Mines School of Mines football team, was last week named first-team halfback of the Montana Collegiate Conference football team.

Kelley Hemmert, Captain and only senior member of the 1959 Mines School of Mines football team, was last week named first-team halfback of the Montana Collegiate Conference football team. He was also named in three other categories as well as offensive player of the week for the Orediggers.

Monograms Awarded to Football Players

The School of Mines has awarded official school monograms to 19 members of the 1959 football team. Mr. Simonich, coach of the team, has announced that the boys who have earned these monograms are: Pete Atkinson, Bradley Blythe, Jerry Blake, Stan Beach, Cam Brown, John Burk, Dave Del Paggio, Ray Goldsworthy, Kelley Hemmert, Mike Hines, Wally John-Bruen, Kenneth John-Bruen, Mike Keegan, Ray Koplow, Gary Kravik, Don Mazur, Bill Teddy, Jeff Vicherek and Jack Walsh.

Close Circle K Club

The Circle K Club elected officers for the new year on Tuesday, November 23. Ken Fitzpatrick, acting president, presided at the meeting.

In the order of business, nominations were called for the follow-

1. President - Leroy Latimer
2. Vice President - Ray Thompson
3. Secretary - James Voris
4. Treasurer - Francis Lucus
5. Executive Board Directors - John Shonklin, James Green, Ken Hines, and Ken Mazur.

A brief discussion followed the election of officers and the meeting adjourned.

Christianity vs. Geology

At exactly 5 a.m. on October 25, in the year 404 B.C. the earth had its beginning. This is a cal- culation made by a Christian Archbishop named Usk, in the minds of most men, not believed true by many religious geologists. It is, however, noted geologists place the origin of the earth at 5 billion years ago. Geology also states that, "from great tur- bulence, things of matter began to develop. Once started, matter would evolve it- self more dust particles and gradually grew in size. The earth is not the only planet that has collections of particles." The Bible (both versions) states, "In the begin- ning there existed a Creator and it was 'dustovich'."

History can trace geology back some 2000 years, while Chris- tianity is a much younger history (written) itself.

Is there then a true and valid conflict, and if so, who is given precedence over the other in ac- cepted truth? The answer is sim- ple. Neither does Geology disprove the existence of Christianity. The conflict is very barely limited from the above-mentioned time conflict. There is a complete and total agreement on the nature of God and the conflict is not based on that at all. The conflict is more concern as to who is the Creator, who is the God of Creation in time. Without a Creator, there is no God, presupposes God.

On the other hand, the church's geologists and all sciences the "green light" to continue any and all investigations based on good, solid evidence as long as they do not conflict between the teachings of the church and the scientific "finds."

Quiz

Think of a number; Multiply it by 5; add 7 to the product; multi- ply this sum by 4; add to the product; multiply this sum by 5; add 4 more; knock off the last 2 digits and subtract 1. The result is the original number itself.

Most of us have seen this at one time or another in the past. The question is, why does it work?

One way to do it is 1750 0.1500 of knocking off the last 2 digits and subtracting 1 usually equals x. Try it, work it.

Sign in hotel equipped with sprinkler system: one should be in bed. You may drown yourself.

Far Out... Near In

By Lee Johns, Know

We realize that this column is under the banner "Record Review" and as such, it is supposed to have been no actual reviews. But we'd like to point out a few things accru- ing in the radio and musical worlds that should be owned. In recent months, there has been much in the press about so-called "folk music" and "pop music." We feel there is a need to cover the situation whereby a record com- pany pays a DJ to play their rec- ords.

The discs do exist. It's been a common talk about problems of the record companies. It exists in Montana, I have never heard about it. To my mind, the disc that says "God, I wish they would spread it around a lit- tle more." The people from the cities and the actual pop music might appeal to some young people or some other expensive item. A different form of pay-off, if you will, to call it that, does exist...

the policy of the companies send- ing "freebies." I personally receive free- bies, but I am sorry to report that with the record collections the way it is, I have approximately 1,000 recordings that I will not be re- ceiving. Many people believe that usually the record companies are giving these freebies. If they are good, they are paid, and if not, they play them out. I am sure that I don't believe this is a bad as accepting merchandising samples or free copies in records. Even if no one else in this column is music lover, I do.

Another subject that has come up for a class is the so-called popular charts. I don't know of one single chart that exists. There is a true barometer of the public's record buying power in the last column, ap- proximately 90% of all money spent for records is spent on albums and NOT singles, as some claim. This statement is not true. I have a survey, a pay-off, in one form or another, does exist in this field. For exam- ple, if I made a "top 50 list" every week I would have more rec- ords in the mail that I could copy- list to, much less play on the air. To me, it's hard to believe that a Presley or Fabian record will sell over 250,000 copies before a record in the top 50 that is not for sale.

Many people believe that a Presley or Fabian record will sell over 250,000 copies before a record in the top 50 that is not for sale. The record industry is one that leads to a clean, healthly and profitable business for all. No one else knows! The next column will be devoted to some new wax.

"Daddy, what is a person called who brings you in contact with people in the bathroom door and yells, 'My God, are you still in there?'"

"A bartender, my son."

Twenty Years Ago

Where were you twenty years ago? If you are one of the family, you may have been staring back at us in the mirror, pointing your finger fingers at the pictures. Twenty years ago, you are my age (in the twenties) and all the investigations based on the seventh day He rested

Know Butte...

CLAIMS HAD CURIOUS NAMES

Three years after Butte was chartered as a city, there were 336 mining claims registered on an index map of the Summit County Mining District (Butte).

Names given to some of the claims by their owners pro-
vided the Butte district with much of its color in mining circles of the nation at that time.

Among some of the most color names given claims were:

The ANACONDA COMPANY

The Epitome of Obfuscation

An engineer is someone who passes as an expert on the basis of his ability to turn out various fine-foutitude infinite strings of incomprehensible formulae calculus with microminiature "thought experiments" and vague assumptions which are based on deltable logic and are taken from incoherent experiments carried cut with invariable lack of veracity, and questionable mentality for a person of average mentality, and questionable mentality for the average engineer. It is not a report of any using and confusing by the hospitally chimerical group of fanatics referred to altogether too thoughtfully by the Michigah Techs.-From the Michigan Tech News.
