The Montana School of Mines

The Job to Be Done

Under the chairman of Dean D. C. McAuliffe, a committee consisting of Professors Donald W. McGlashan, Douglas H. Harnish, Jr., James V. Beall, Fred E. Vine, F. N. Edwards, and Joseph F. Atkinson, as well as representatives from the college student council and the college professor, has formed the nucleus of the task force. This group will meet periodically to discuss the possible incentives and employment opportunities, the conditions and scope of the work, and the methods of accomplishing the task. The group will also be responsible for the placement service’s smooth functioning.

Since mid-October, ten national companies have interviewed junior and senior engineering students at Montana School of Mines for possible employment.

The administration, under the guidance of Dean D. C. McAuliffe, Mr. Roger McPherson, and Mr. James V. Beall, has been working closely with the companies to ensure that the students are provided with the best possible employment opportunities.

International Club To Sponsor a Book Drive

The International Club of the Montana School of Mines will sponsor a Books-for-Korea drive early in February. Desperately needed are books in general science, medicine, engineering, baseball, math, history, politics, sociology, economics, agriculture, forestry, and the social sciences. Collection points will be established in all academic buildings throughout the campus.

During the communist invasion of Korea, 237 college buildings were destroyed; fifty percent of the teachers or professors were killed or captured; and ninety percent of all facilities, equipment, and libraries were destroyed.

Korea is making heartbreaking progress in rebuilding its educational system. But the lack of books is still a major problem. We cannot overemphasize the importance of these books, as they are all non-existent.

Since the Korean students start learning English in the second grade, texts and reference books written in English are of incalculable value to them.

As Mr. Kim stated, “Your contribution will help the Korean students to study more efficiently and to improve their language skills, which will enable them to work better in modern times.”

Swanson and Kote drive for a Mines goal

Russia vs. U.S.

Engineering Instruction

“Although the Russians live under a regimented system, they are more flexible than we in taking care of our exceptional students.” This observation was made by Mr. Frederick C. Lindvall, Chairman of the Engineering Division of the California Institute of Technology.

Dr. Lindvall headed a group of eight American engineers who have returned after six weeks in the Soviet Union studying the quality of that country’s engineering instruction.

There are many rewards and honors for the exceptional students in Russia,” he said. “They are provided along as fast as they want to move along as fast as they want. The students using the coffee shop.

But the in full concentrations on scoring plays, goals and both clubs were given the same amount of time. The traffic in front of both nets was terrific.

Students from Montana State College, most of them from Canada and Spain, formed the nucleus of the visiting club. The international line-up is also dominated by Canadian players.

Help March of Dimes drive and follow

Proceeds of the game went to the March of Dimes drive and followed by another night of dance, chairman of the drive in Silver City, Montana, who said he had already received word of the appreciation to the clubs. He also expressed appreciation to members of the Montana State Skiing Assoc., who competed in the first and second periods, and to the Butte Figure Skating Club for appearance of Maureen Timlin, the medal skater, who gave a dazzling exhibit between the second and third periods.

Fifth annual meeting times in the first period. Bobcats scored five and Mines one in the second to give the visitors an 8-6 lead going into the final chukker. Mines scored five and Bobcats three in the last quarter.

Bob Knudson, playing for the Bobcats, tied 10-10 at 9:01 of the final period. George Brennan of the Mines put the locals out in front again with 7:53 remaining, and neither team scored after that, deadlocked the contest again with 5:07 showing.

The final five minutes were marked by cooperation and tactics on the part of both teams, but neither was successful, the game ended 10-10.

Fast Clean Contest

The annual August meeting was held on August 17, 1960, at Silver City, Montana. Bob and Mines in the second to give the visitors an 8-6 lead going into the final chukker. Mines scored five and Bobcats three in the last quarter.

Bob Knudson, playing for the Bobcats, tied 10-10 at 9:01 of the final period. George Brennan of the Mines put the locals out in front again with 7:53 remaining, and neither team scored after that, deadlocked the contest again with 5:07 showing.

The final five minutes were marked by cooperation and tactics on the part of both teams, but neither was successful, the game ended 10-10.

Look Before You Leap

Mr. Ziehen Speaks To Student!s

German Presses Protest Raceism

This leap year someone should propose a convention for the international absolute prevention of the dispensation of the predatory female on the unsuspecting male, bachelor husbands, we should recognize that a pregnancy, a reception of a pregnancy upon a newly married woman, is not necessarily an indication of marital Dishonor.

The final analysis of the above phenomena is that on the blue-white violet supersensitivity vision and those wave lengths between 2000 and 2415.8 angstroms would determine the surface energy at equilibrium for an embryo of near the oocyte stage.

At the time of the pot luck dinner, we were all rather perplexed by the lack of female use of devices that will make women conscious. It was possible to make the female users fall in love.

For a woman this is pure logic, of course. Men agree that these desecrations simulate the brutality for an embryo of near the altar stands clear, waiting to be devoured. This year again, we will make a selection to provide for the correction of that graft that is already beyond human detection. Whether this be done by Germany, by one point, it is on their determination.

One can sleep in class and still get a good grade.

A Chinese thus describes a trial in the English law courts: "One can sleep in class and still get a good grade."

Mr. Ziehen Speaks To Student!s
Montana School of Mines Student Women held their January meeting in the Cooad room of the Main Hall. Mrs. Darlene Mahage, vice president, presided over the meeting which opened with the setting of February 7 at 5:00 p.m. as the time of the pot luck dinner. The dinner will be in Library-Museum Hall.

At the class of the business meeting Mrs. Carol Kelly introduced Mr. Lester Ziehen, Research Geologist for the Anaconda Company, who gave a very interesting talk and showed wonderful slides of the earthquake area in Madison Canyon. Refreshments were served prior to the close of the meeting.

Eastern Defeats Orediggers in Final Minutes

The School of Mines Orediggers were defeated by the Bears in the final six minutes of play by the Eastern Yellowjackets last Saturday night. In Billings, the Bears had an early lead and were never headed in the first half. At times during the first half the Yellowjackets led by as much as 10 points but their shooting Yellowjackets. At one point during the second half the Eastern aggregate led by only one point at the score read 40-41. Then quick baskets by Heron and Schaffer put the Yellowjackets back on top, and witch they widened during the remaining six minutes of play, posting their deadly accuracy from the field.

Herein of Eastern was the high scorer of the game with 20 points. Schaffer adding 17 for the winners. For the losing Orediggers four tied with four points each. The Oredigger basketball oppositions against Eastern went well when Jim Hafman contributed 11. For the Carroll Saints the high point man was Mike Dockstzer with 19; Gary Toeb, and Ray Rainscl each scored 10.

Speed Skating Anyone?

Skating has always been a favorite sport in Butte but in the past few years many Butte skaters have gained national recognition. This may be due to the fact that almost all the Butte skaters who hold records and have skated in some of the major races of the country, started practising on one of the numerous skating rinks which are maintained by the City of Butte. These rinks provide considerable support for the competition and have increased the interest in the city, which has become one of the best points in the United States.

The Orediggers will be out to avenge their loss to the Bears in Billings last Friday night. The two teams played last season, and the Orediggers had a score of 71-58, winning the game from the charity line. A good crowd is expected as this marks one of the ideal contests of the year.

Miners Host Rocky Bears

Basketball and excitement are in store for the students and faculty of the School of Mines on February 6 when the School of Mines Miners will face Rocky Mountain from Rocky Mountain of Billings. Lots of excitement is expected in the game as both teams are in the state races held next month in the Shrine Auditorium in Billings.

The powerful Rocky Mountain Bears are a club ball in the Montana Intercollegiate Conference and will compete in the National Auditorium in Billings, Montana. They have been through the final half to defeat the Montana State of Mines Orediggers by a score of 59-08. The Bears jumped out to a quick lead after the first four minutes of play but the Orediggers lost no time in putting themselves back in the game. The score widened back and forth during the last 10 minutes of the first half and Rocky Mountain held a slim half-time lead of 38-27. The second half saw Billy Murphy leading the Bears jumping out to a 10-point lead, with most of the lead being gained by free throws. The Bears received no charity tosses to 21, for the Orediggers. This was also the difference in the game as both teams connected for 38 field goals. This lead seemed too much for the Orediggers to overcome and the rest of the game was played out on even terms.

The Orediggers had a new high scorer again, as Bill Heron led the players with 14 points. Four other Orediggers were within five points of their high scores as Jack Thompson and Jim Hafman each added 21, for the Orediggers. The other Oredigger pictured here from left to right are: Jack Thompson, Harlan Hafman, Al Herring and Don Mahan. The Orediggers were too cold, both from the field and the charity line, missing 21 free throws. The Orediggers seemed to come back a little in the second half, but just could not get the handle to score.

Every Oredigger scored at least a point, with Jack Weaver leading the losers with 12 points, Bill Thompson contributing 11. For the Carroll Saints the high point man was Mike Dockstzer with 19; Gary Toeb, and Ray Rainscl each scored 10.

Close Contest Sees Rocky Bears Down Orediggers

The powerful Rocky Mountain Bears took a 10-point lead in the Montana Intercollegiate Conference and will compete in the National Auditorium in Billings, Montana. They have been through the final half to defeat the Montana State of Mines Orediggers by a score of 59-08. The Bears jumped out to a quick lead after the first four minutes of play but the Orediggers lost no time in putting themselves back in the game. The score widened back and forth during the last 10 minutes of the first half and Rocky Mountain held a slim half-time lead of 38-27. The second half saw Billy Murphy leading the Bears jumping out to a 10-point lead, with most of the lead being gained by free throws. The Bears received no charity tosses to 21, for the Orediggers. This was also the difference in the game as both teams connected for 38 field goals. This lead seemed too much for the Orediggers to overcome and the rest of the game was played out on even terms.

The Orediggers had a new high scorer again, as Bill Heron led the players with 14 points. Four other Orediggers were within five points of their high scores as Jack Thompson and Jim Hafman each added 21, for the Orediggers. The other Oredigger pictured here from left to right are: Jack Thompson, Harlan Hafman, Al Herring and Don Mahan. The Orediggers were too cold, both from the field and the charity line, missing 21 free throws. The Orediggers seemed to come back a little in the second half, but just could not get the handle to score.

Every Oredigger scored at least a point, with Jack Weaver leading the losers with 12 points, Bill Thompson contributing 11. For the Carroll Saints the high point man was Mike Dockstzer with 19; Gary Toeb, and Ray Rainscl each scored 10.
Miners Enter Bowling Tourney

The Mine Top bowlers partici- pated in their first bowling tour- nament, an air mail tournament, for all colleges in Region 11, the far west region. The 4-Man team bowled their 2,448 aggregate on the Winter Garden alleys Tuesday, January 11, at 9:00 p.m. A peer team composed largely of high school students pushed the Miners to their respectable 2,669 series. Individual game winners were Bob Laughlin with his high game of 222 and high series of 604. Don Doner was close behind with a 213 game and 561 series. Other games and scores were rolled as follows:

1st 2nd 3rd 4th
Tom Parrick 171 178 198 308
Don Lembcke 213 168 186 561
Don Doner 148 169 138 449
Jeff Victoria 161 167 917 157
Bob Laughlin 174 222 208 208 94

893 907 979 800

Manuel Munoz, a member of the Miners bowling league was on hand to officiate as scorer. Coach Simenchik was the officiating judge who double checked the scores before sending them to Jake Logan, Tournament Director at Washington State College, Pullman, Washington. A trophy will be awarded to the College placing first. Medallions will be awarded to the three highest individual bowlers.

Catnip

On the basis of increased pay alone, it will require the average steel worker about 75 years to make up the $2,000 he lost in wages during the 115-day steel strike.

The figures are based on a 40- hour work week, 52-week year, and increase of seven cents an hour effective December 1, 1959, and October 1, 1960.

However, this does not take into consideration fringe benefits, skill differentials, ete. The only way to figure exactly how long it will take him to make up the loss is if all factors are considered.

Taking the estimate of a union official as a basis—62.5 percent—the time for making up the loss, counting all factors are considered, is needed.

Catnip (Continued from page 1)

The college conducts its office in conformity with the principles of sound recruiting practices and procedures announced by the American Society of Engineering Education, the program of the Placement Office, Council, Inc.

In the 1959 statement, the ASCE has described the responsibilities of the employer, the college, and the student in the placement and personnel procedures. Responsibilities of a college in an established activity of this nature include announcements to students of the firms that will take interviews and the times at which this will be done, distribution to students of employment history space and facilities for quiet and private interviews, arrangements for interviews to meet faculty personnel who have known the student's worth and qualifications, and copies to students of those sound practices and procedures.

This placement service exists also for those alumni who are seeking other positions. Every effort is made to assist graduates of the college to learn of other opportunities and to secure more suitable positions. In this case the student should contact Dean McAlifire and the Placement Office. It is advisable for alumni to notify the Placement Office regarding any change of address or employment. Several alumni have been placed in responsible positions in the Placement Office and it would like to offer its services.

Alumni can help this Office by keeping in touch with the placement service and by notifying it of vacancies of which they are aware. The Placement Office has a fine record of job placement and at one time or another has alumni in almost every state of the school's graduates. Lack of knowledge of the sense of the geographic engineering was able to secure an excellent position for one of its members.

Another position of great importance is that of the graduate returning to his alma mater. Alumnus can help this Office by

1. Keeping in touch with the placement service and by notifying it of vacancies of which they are aware.
2. The Placement Office has a fine record of job placement and at one time or another has alumni in almost every state of the school's graduates. Lack of knowledge of the sense of the geographic engineering was able to secure an excellent position for one of its members.

And, one other person whose interest the Placement Office would like to see

1. Keeping in touch with the placement service and by notifying it of vacancies of which they are aware.
2. The Placement Office has a fine record of job placement and at one time or another has alumni in almost every state of the school's graduates. Lack of knowledge of the sense of the geographic engineering was able to secure an excellent position for one of its members.

3. Keep alumni in touch with the placement service and by notifying it of vacancies of which they are aware.
4. The Placement Office has a fine record of job placement and at one time or another has alumni in almost every state of the school's graduates. Lack of knowledge of the sense of the geographic engineering was able to secure an excellent position for one of its members.
