Lyons Lauds Wild Life

A wealth of experience, a fund of information, and a vivid recollection of the broad and vital subject of conservation was reflected in every detail of Mr. Lyons' authoritative presentation, "The Sierra Nevada: An Active Landscape." The audience listened with rapt attention as Mr. Lyons, a noted conservationist, pointed out the threats and potential dangers to the natural environment of the Sierra Nevada. His talk was punctuated with anecdotes and statistics, making it a truly engaging and informative presentation.

Student Victim Of Accident

Owen T. Dickerson, freshman from Troy, Montana, received a gunshot wound, Sunday, April 9, as a result of an accident taking place while target shooting. James L. Mathison freshman from Idaho, Idaho, Washington, who with Philip Dunton was also target shooting, fired his 22 at a tin can about 120 yards away. At that moment, Dickerson, who had been crouched in a shallow gulch with Robert Beers, put the target on a plank. Dickerson stood up. The slug struck him in the back of the head. He was taken to St. James Community Hospital and from there he was taken to Missoula to have the bullet removed. His condition, Monday, April 10, was described as good.

Mineral Dressing Department Wins E-Day Award

A multi-engine pilot who flies between assignments, Mr. Harvey is the author of three books and numerous magazine articles on aviation. In December, 1941, Harvey was in Hawaii on a news assignment, and is still chagrined because he sailed for the U.S. two days before the Japanese attack. He served for 15 months as a B-25 pilot in the Pacific Theater, and was discharged as a captain.

Paul Harvey To Deliver Commencement Address

The Program Committee passed on a list of the departments' suggestions for commencement, campus, and the movie schedule.

After hearing the lectures and seeing the exhibits and demonstrations by the students, the 'public was invited to have coffee served by the Coed Club with the assistance of Mrs. Mike Maddocks in the Student Union Building.

Feathered Sunday was an Air Force jet on a mobile display. KOUP interviewed students and teachers for broadcasting and advertising concerning the E-Day (Continued on page 3)

Aylward Lectures

Newman Club

Mr. Zeihen is a graduate of Montana School of Mines and is prominent in alumni activities of the school as well as in community projects. He is director of geological research for the Anaconda Company.

Other members of the local advisory board are Howard R. Johnson and George E. Richardson.

Miller to For ASC of Mines

Coed Club Active During E-Day

In addition to these, a Doctor of Laws degree, Honoris Causa, will be conferred upon Mr. Harvey during the commencement exercises.

Students are asked to take note of the fact that the date for commencement exercises has been moved up to Sunday, June 4, at 1:00 p.m.; this is a change from the former date of Monday, June 5. Further details will be given at a future time.

**EDITORIAL**

Spring is here (according to the calendar)!!

After the long winter before the weather cooperated, it may well be that you will be able to take a drive and enjoy the blossoming of familiar sights. Springtime also brings with it hope and promise. The sun shines more brightly, the flowers bloom, and the air is fresh and invigorating.

The Amplifier, the yearbook for Robitaille High School, has been published. It is a beautiful representation of the school's culture and spirit.

On Wednesday, April 5, Mr. Don Mahagin spoke to the students about the Law School Admission Test. The test is designed to measure the knowledge of cultural and mathematical backgrounds of prospective law students. The test is intended to ensure that candidates are prepared for the rigorous curriculum of law school.

The Law School Admission Test, also known as the LSAT, is an important component in the law school admission process. It assesses a candidate's reasoning and analytical skills, as well as their capacity to handle legal reasoning and research.

**Who's Who on Campus**

Mr. Kepi

Good personality on campus this month is Mr. Kepi, a junior at Butte High School. He is known for his enthusiasm and positive attitude.

Mr. Werner Raab

This week's campus personality is Mr. Werner Raab. He is known for his good looks and charming personality.

Werner Raab is now a sophomore enrolled in the geological engineering course with a Petroleum option. He carries the regular sophomore 18-hour credit load and plans to take post graduate work after graduation. He is interested in the study of geology and would like to do post-graduate work in that field.

Werner's hobbies include photography, painting, and hiking. He is a member of Sigma Eho, International Club, and the Maga and zwag.

When asked if he can comment on the political quackery, he says, "It's hard to say whether or not it's a big annoyance, but with all which is more important, your life or green grass?"
Coach Cullen Picks Baseball Squad

After an intersquad game on Saturday, April 8, Coach Bill Cullen announced that the MCC championship that the Ore- diggers won last year.

Members of next year's squad will be Dave Bennett, John Casaver, Bob Dike, Pete Gross, Gary Hauder, Bill Bayliff and Marvin Sene. Following the initiation, a party was held at the Ranch House.

Electors of Theta Tau would meet with Mrs. Gauder at the Ranch House.

Also discussed at the meeting was the scheduling of Theta Tau's next game. Bob Dickenson, Bob McGahee and Mike Olson were scheduled against Western and is to be played in Butte. This will be a conference game and is set for

Tourists

If you have tried to take any of the tables from the Copper Lounge home lately, you have probably noticed that they won't budge. It seems that all the fixtures in the lounge, from the tables and benches to the main section of the building to the counters (and even Mike's refrigerator) have been permanently in position. This inconvenience to the students who usually reassemble the tables to accommodate large groups of friends who come to the lounge is a result of the condition of a loan which made possible the construction of the building.

Since the building and all the fixtures were purchased on the loan, they must all be attached to the building to prevent the use of them in other buildings on campus.

This is a federal law so it looks as if we will have to put up with immovable fixtures until at some future date the Copper Lounge is paid for, and we will once more be able to move them around as we wish.

Peace Corps Members Deferred from Military

The Peace Corps has been established by executive order of the President. Legislation has been requested to continue this organization. The activities of the Peace Corps have been covered rather completely by the press, radio, and television. Its relationship with the Selective Service System has been indicated, but a statement of this relationship seems advisable.

The Universal Military Training and Service Act, as amended, is flexible enough to provide deferment for members of the Peace Corps without amendment of any kind. In other words the relationship of the Selective Service System with registrants who become members of the Peace Corps can be handled administratively.

The power to defer registrants who perform functions in the national health, safety, or interest now exists. The establishment, and operation of the Peace Corps is in the national interest. So the classification of registrants in the Peace Corps can be handled as any other registrant engaged in activities in the national health, safety, or interest. They will, of course, enjoy the right of appeal shared by all registrants of the Selective Service System.

Soviet veterinarians have developed an electronic apparatus that can tell in 30 seconds how much fat is in a pig. . . 40 states now have programs of unemployment compensation which pay out for half a year or longer . . . All babies born at San Francisco hospital between Christmas Eve and January 1 are sent home in stockings . . . Sign in a bar: "If you're drinking to forget, please pay in advance" . . .

Railroad crossing sign near Colorado Springs, Colo.; "The average man asking to whom they were listening. Eighty per cent said it takes a train to pass this crossing is 14 seconds whether it is on it or not."

THE GREATEST MINER

Marcus Daly at the turn of the century was extolled by Montana Judge W. O. Speer as the greatest miner the world had ever produced.

The Judge said:

Mr. Daly sank more miles of shaft, drove more miles of drifts and levels, broke more rock and hoisted more ore than any other man in the world.

He was the father of the copper mining industry in Montana. It was he who made deep mining in Butte possible. He made Butte the greatest mining camp in the world. He founded Anaconda and made it the greatest smelting city in the world. He built the city of Belt and fathered its coal mining industry.

He also fathered the city of Hamilton.
