7 Are Named To Who's Who

Students Go to Spokane

On Thursday, November 29, nine students, accompanied by the faculty member, went to Spokane, Washington, to participate in the Northwest Mining Association, and it allows the members—mining men in Northwestern America—to gather together and exchange new ideas and methods. Approximately five hundred men from the Northern United States and Canada convened on Friday, November 30, and Saturday, December 1.

The technical sessions, most of which were quite good, concerned themselves with all aspects of mining, from geology and exploration to mine finance. There were talks on the geology of the Butte Hill, the Phillipsburg district in Montana, and various districts in Idaho, Washington, and Alaska; sessions were held on silver and coal; talks on milling covered certain aspects of mine theory and mine practices; also a panel discussion was held which covered mine financing and stock offerings.

Mr. W. Van Mater, instructor in Mining Engineering, accompanied three seniors in mining: John Dewis, Dave Greenberg, and Marv Senn; one in mineral dressing: Al Raith; and five juniors in mining: Ken Arno, Syd Brown, Art Ditto, Ray Hyppa, and Lee Superstein.

The group that went to Spokane was able to relax and enjoy themselves while travelling on the train, at the Slug breakfast, also at the hospitality parties and cocktail parties, and at the banquet and dance.

All who attended this convention expressed a willingness to attend next year.

Coach Simonich is featured in the "Faces in the Crowd" section of the December issue of Sports Illustrated. He will be presented with a special Sports Illustrated Award of Merit. He will eventually receive an engraved name plate.

The Montana Section of the AIME will have its annual dinner-dance at the Elks Hotel tomorrow evening. Anderson-Carlos members and their ladies are invited to this fine party.

Dr. Koch attended the meeting of the Council of Presidents (of the university units) on December 9, the meetings of the Board of Regents on December 10 and 11 and a meeting of the Montana Council on Natural Resources and Development on December 12.

George Sever and Charles Olson have received honorable mention on the National Association of Intercollegiate Athletic small college All-American football selection.

BRAD BILYEU

Bilyeu, a petroleum engineering major, is the son of Mr. and Mrs. Bud Bilyeu of Wolf Point. While attending Wolf Point high school, Bilyeu was a finalist in the National Merit Scholarship examination, and participated in football and track. At Montana School of Mines he has been active in the M-Club, of which he is president, the Copper Guards, AIME, and Theta Tau fraternity and is now the secretary-treasurer of the Senior Class. Bilyeu has served on the Residence Hall Council, and has been the recipient of the Great Falls Beef Distributors Scholarship and the Socony Mobil Scholarship.

Brad, an all-conference football guard, was chosen in 1962 for the Montana Collegiate Conference's first team. He has participated in Montana School of Mines' intramural program.

Since 1963, he has been employed by Silver Bow County and the Anaconda Company as a powerman, teamster, and truck driver, and last June worked with the Continental Oil Co. in Powell, Wyoming.

WILLIAM COGLIAN

Coghlan is a metallurgical engineering major. He is the son of Mrs. Jane Coghlan of Manhattan, Montana.

Valedictorian of his class, Coghlan was a member of the band, student council, of which he was president, the photo club, and the chess club while in high school.

(Continued on page 3)
GOALS

The student body of Montana School of Mines is a group that displays an interesting case of disunity. There exists a number of major factions: those that are pursuing the engineering course, those that are not. With the present set-up at MSM it is inevitable that there will be differences in opinions between these two groups, however, this type of conflict causes little or no harm. It is the sheer difference that exists between those students who attempt to learn the matter, that is offered, and those students who make no attempt to assimilate the proffered material that can lead to a dangerous situation on our campus.

No matter what course a person follows, as long as he is interested in advancing his education, he will insist on academic excellence. It is to his advantage to receive his education from a school of excellence. As long as the students at a school are desirous of a good education that the standard of education will be shabbily. The standard of education is set by the student, for the school does nothing but offer; the quantity of matter accepted is set by the student.

At Montana School of Mines the situation is completely analogous. If we become lackadaisical in our schoolwork, if we are predominantly interested in our social life over our academic life, then we will find that we are attempting an education in a school that is doing a good job of offering matter for our training, but if we do not avail ourselves of this material, upon completion of our formal education we will have learned little or nothing. This poor education will reflect on our school, although it will not be the school's fault, and will lower its reputation in the eyes of others.

It appears that there are students at this school, or in this city, or across this nation who are attending college for some reason other than the receipt of an education. This is unfortunate. ' '

In Recognition

by Brenda Brophy

SMILEY

Nearly everyone about the campus notices a new paint job. The gym's causes the track and rails look a little shinier, and the co-eds are thankful for their new matching washroom. Furniture, though, most people tend to forget that those things don't just happen, but rather are the results of someone's hard work. In this case that someone is Ernest Secome, who works in the President's office, is Smiley's niece.

When asked how he acquired his nickname, Smiley had an interesting story to tell. It seems that when he was about 15 or 16, Smiley became a member of the Messenger Force here in Butte. This group consisted of about 16 bicycle-riding young men who were assigned to leave the school every day the trees at the south end of the campus and the large tree in the center of the north end were planted. The Senior Class of 1930 took time off from their studies to take a trip which covered much of the Eastern part of the United States. The itinerary was varied but some of the high points were visits to New York City, Philadelphia, and Chicago. 1930 must have been a marvelous Year for those lucky Miners.

McManns Speaks

On Tuesday, December 4, Dr. Walter McMann, Chair Professor of Geology at Montana State College, was a guest speaker at the Montana School of Mines Department of Geology. His program, entitled Review of Alpine Techniques, was illustrated by Kodachrome slides. The meeting was open to the general public.

Womens News

by Carol Griffith and Doreen Shee

The Christmas Formal, the highlight of this academic year, was presented by the Montana School of Mines Associated Women Students. There were over 1000 students, faculty and staff members who were the guests of the Co-eds at this extravagant affair. The women are working hard to make this event the most outstanding of the year. The traditional year's dance is "Sugar Plum Fantasy," the main center of attraction will be the huge tree which customarily adorns the Student Union. The room will be decked out in clusters of pine boughs and red bowers, centerpieces, Colorful punch will be served and will be prepared with the spirit of Christmas in mind. The guests will dance to music by the Black Knights. You cannot tell Santa even may give you even at the door.

College deferment

Every male citizen of the United States is required by law to register with the local draft board on or within two weeks of his eighteen birthday. After registration his file is processed and classified. This classification is generally I-A until the potential draftee reaches the age of 21, after which he will either be classified or drafted. If a full-time student at any recognized college or university is notified to take the required physical, he should immediately notify his father or his official who will give him the necessary forms to gain recognition for college deferment. This will apply only to full-time students; part-time students are not recognized. The purpose of college deferment is to allow the prospective draftee to complete his college work, thus completing his military obligation.

Brown to Be Santa

Sydney Brown will don a Santa Claus suit on December 20, to pass out gifts to the children at the Sigma Rho Christmas Party. Preliminary plans were made for the third annual party at the November 27 fraternity meeting. As last year, the children's party will be held in the Copper Lounge with the help of the Coeds.

Sigma Rho congratulates Charles Gale and Elvin Beardsee for each receiving an Anaconda Company Scholarship.

Lithium is the lightest of all metals.

Friday, December 14, 1962

Who's Who —
(Continued from page 1)

He is a member of AIME, Copper Guards, American Association for the Advancement of Science, and the Glee Club. Currently, he is vice-president of the American Society for Metals, vice-president of the metallurgical section of Anderson-Carlisle, and the 1965-66 local chapter De- partment display chairman for 30 Days. Bill was the recipient of a $500 Freshman Scholarship, an Advanced Scholarship, the $500 American Society for Metals Scholarship, and $500 AIME Auxiliary Scholarship.

Since 1959, he has worked for Don Fletchers Appliances as a serviceman, and during the summer of 1962 he was employed with Boeing Scientific Research Laboratories in Seattle.

ED DAVIS

Davis, a member of Theta Tau Fraternity, is the son of Mr. and Mrs. Frank Wills. He attended Butte High School and during that time was a member of the National Honor Society. Upon graduation from high school, he entered the United States Air Force and was an electronics technician. After completing military service, he entered Montana School of Mines and has since then been employed by the McClintock Drilling Company. Later in the fall, Davis entered the Ski Club of which he has been a member since 1959.

Erickson received the Women's Auxiliary of the AIME Loan Award, and Advanced Scholarships while at Montana School of Mines. Twice he has been on the honor roll.

He has been successively employed by the McClintock Drilling Company, Koevel Importa, Montana Phosphate Co., Cash 'n' Carry Grocery, Montana Mines, and Anderson-Carlisle. He has been a member of the Sigma Rho Christmas Party. As last year, the children's party will be held in the Copper Lounge with the help of the Coeds.

Dave is married to the former Agnes Howe of Butte. He is a member of the Anderson-Carlisle Society, the Copper Guards, American Society for Testing and Materials, and is a student assistant in the structural geology laboratory.

Erickson entered the United States Marine Corps Reserve in September 1955 and was discharged six years later. In the Corps he was an instructor and the platoon sergeant of a rifle company. He is married to the former Rosalie Sheridan and is the father of three children. His parents, Mr. and Mrs. Victor Erickson, live at 1220 Shiley Street, Butte.

DAVE GREENBERG

Greenberg was a graduate of Hapnot Collegiate High School and attended Montana School of Mines during 1959-60. He then attended Montana School of Mines and has since then been employed by the McClintock Drilling Company. Later in the fall, Davis entered the Ski Club of which he has been a member since 1959.

Dave was the junior class vice-president. He is a member of the Copper Guards, AIME, the American Society for Testing and Materials, and is at the present time, the secretary-treasurer of the Anderson-Carlisle Society. For two years he served as president of the Residence Hall Council. He received the American Society for Testing and Materials, and the American Smelting and Refining Society Scholarship. He is a mining engineering major.

Greenberg has been employed by the Print Shop and Drawing Co., Ltd., in Flin Flon, Manitoba since 1958 and while attending Montana School of Mines during 1959-60, he was a student assistant. He is now student manager of the Copper Lounge.

Distance Runner

Cal Strobel, Montana School of Mines' distance runner, broke the record in the recent American Legion cross-country race. Cal's time for covering the three-mile course was 15:26 which is one second less than the record set by Chuck Smith. The race, in downtown Butte on November 10, is held for high school students from Butte and surrounding area and the winning school receives a trophy. Cal's feat was not recorded because of his college standing.

Mines at Calgary

The Orediggers opened their basketball season against the University of Alberta with games on November 30, and December 1. Lack of height and experienced players were too much of a handicap for Ed Simons' squad to overcome. The Miners exhibited good potential for the coming season as they held their own during the first half of each game. However, every advantage from the opponents' full-court press and fast breaks halted the Miners in the second halves.

The Friday-night game saw Canadians nearly double the 27 points scored by the Orediggers. The following night the game ended with a 28-point advantage for Alberta.

Frank Skepko, Anaconda freshman, was high scorer for the Miners hitting 17 and 18 points. John Badovinac netted 13 and 16 points.

Girls Play In League

Four School of Mines co-eds are members of the only undefeated team in Butte's YMCA Women's Basketball League. Cherrie Beete, Vicki Markovich, and Kay Chambers have shared the guard position on the team. This petroleum major, also of the Mines, has filled the half-mile and placed second in the two-mile. He won the two-mile and qualified for the national NAIA meet in Idaho; he also placed first in the mile. That year he was high school held their own during the first winners, while J. Dunstan had Cal's standing, second half rally, led by Frank Skepko who hit 26 points, brought the Miners to a tie. The game was a see-saw battle until the final minutes to gain a 72-61 victory for Alberta. Skepko had a 33-28 half-time edge on the Miners to lead all scorers. Roesti garnered 27 points for the losers. Chum Roesti added 19 points to the Miner's total. Rossmack hit 26 points for Ricks and Glen Church added 20.

In the second game Ricks sought from behind in the final minutes to gain a 72-61 victory over the Mines. Ricks took an early lead only to have the determined Miners fight back and get a lead which held up until the final minutes. Roesti held a 33-28 half-time edge on the strength of a 10 point outburst in the final minutes. Roesti held a 12 point lead at the 15 minute point. Another rally, led by Glen Church, brought the Vikings back at 56-55 and they never relinquished it. Chum Roesti garnered 27 points for the Miners to lead all scorers.

Intelruural Play

On November 28th Intramural Basketball at the School of Mines got off on a swing, with four games being played.

The Flunking Five, fourth place winners last season, whipped the Chodda Choppers, second place team, 49-27. Hogart scored 18 and Richards 18 in pacing the winners, while J. Dunstan had 12 for the losers.

In the second game of the evening, Rho I rombled over Tau I 54-41. Peterson was high man of the winners with 18 while Rallie had 9 for the losers.

November 29

Tau II defeated Rho II 43-24. Roger was high man for Tau II with 20, while Dykeman dunked in 10 for the losers.

In the second game, Tau III trounced Rho III 94-11. Quilty achieved top scoring honors with 28, while Olsen and McCarthy each had 18. Schulz led Rho with 9.

December 3

 Tau IV came out on the short end as Maynard Mob defeated them 41-23. Strobel paced the winners with 14. Nollis and Murray each had 7 for the losers.

In the 8:00 game Ricks Five gave the Miners a 14 point lead at the 12 minute point. Another rally, led by Glen Church, brought the Vikings back at 56-55 and they never relinquished it. Chum Roesti garnered 27 points for the Miners to lead all scorers.

Santa Resumes Training

'Twas the night before Christmas and all through the house Not a creature was stirring not a soul was stirring

Every student was snug in his bed
While Santa was keeping his promise to Big Ed He'd promised his coach he'd keep in condition And deliver his gifts in the Christmas tradition. He did push-ups and sit-ups and played basketball So he'd have the strength to deliver his haul. Now Santa is a real trim guy So he'll bring lots of goodies to U and I.

THE KEY TO GROWTH

Our nation has become great the leading power of the world, under our free open enterprise system. That is generally known and accepted. What is not commonly realized is that profits are the life blood of the nation's growth. For any business the essential ingredient for success in an increasingly competitive climate remains what it has always been—an adequate profit. Remove that ingredient by high taxes or other means and the business is removed.
