This Book is brought to you for free and open access by the Student Newspapers at Digital Commons @ Montana Tech. It has been accepted for inclusion in Amplifier (1955-1977) by an authorized administrator of Digital Commons @ Montana Tech. For more information, please contact sjuskiewicz@mtech.edu.
Eight seniors make "Who's Who"

M. A. Awan
Awan, president of the senior class, attended Aitchison College, in Lahore and is now a senior in the environment and resource management major. Awan is the president of the college’s International Club and American Society for Metals and Minerals. Awan has been elected to the student body, president of the AIME (American Institute of Mining, Metallurgical, and Petroleum Engineers). He has been awarded an advanced fee scholarship. He is a member of Theta Tau fraternity and has participated in the Student Council. He has published an article in the college’s newspaper, "Mining in America: A Brief History of the Industry.

C. K. Peterson
Peterson, a senior in petroleum engineering, has been elected president of the college’s freshman and sophomore class. Peterson has been a delegate to the student council and secretary of the college’s disciplinary board. He is a member of the college’s Honor Roll and has been on the Honor Roll. Peterson is in the recipient of the freshman fee scholarship. Peterson is expected to receive his degree in petroleum engineering in June.

J. L. Weaver
Weaver has been selected manager of the Student Union for the past two years. He was president of the Freshman Class, vice-president of the Student Council, and a member of the college’s disciplinary board. Weaver was the recipient of the Consolation scholarship, and has participated in track and field events. Weaver is a petroleum engineering senior, and has been elected president of the college’s freshman and sophomore class.

Prof. Stoup Receives Fellowship
Kocher S. Stoup, Associate Professor of Engineering, has been granted a Fellowship by the National Science Foundation. The Fellowship is for 15 months of study in the field of engineering mechanics. The study will be given toward a Ph.D. degree. Mr. Stoup will take his leave of absence and study at the University of California at Boulder, Colorado.

C. E. Simonich
Simonich has been awarded a varsity football, basketball, and baseball scholarship. He is a member of the student council and also serves as secretary-treasurer of the Monomoco Club, and corresponding secretary of the Theta Tau fraternity. Simonich has been a delegate to the student council, and Delta of the Copper Guards. He has received fee scholarships, an honor scholarship and the Molten Company Scholarship during his junior and senior years. Simonich is a senior in petroleum engineering.

R. W. Toivonen
Toivonen, a metallurgical engineering senior, is president of the student council and secretary of the American Society for Metals. His degree is in metallurgical engineering. Toivonen has been selected to represent the college and university students in the metalurgical field. Toivonen has been selected as a delegate to the Student Council and also serves as the college’s representative to the Student Council. His name has appeared on the college’s honor roll.

Department News
Dec. 14—A. S. M. Meeting. Mr. Thomas presented a symposium of Reserve Mining Company’s operations.
Dec. 15—Student Council and Dorm Council meet with Lighthouses from Silver Bow, Deer Lodge, and Powell counties.
Jan. 9—Basketball game with College (Home).
Jan. 14—Student Council and Dorm Council meet with Lighthouses from Silver Bow, Deer Lodge, and Powell counties.

AIMF Membership Drive
One object of major interest in the Student Union Building Tuesday and Wednesday was the table set up by the Anderson-Carlisle Society, headed by Larry Eaton. The Society, member of the college’s disciplinary board, has been selected to represent the college and university students in the metalurgical field. The table has been set up displaying numerous pamphlets describing various types of activity in this field. Over the two-day period that the display was in operation, sixteen members were recruited, and a continuing effort will be made to draw others to the organization. General students will be welcomed, as well as engineering students. The annual membership fee is $4.50. This fee covers the cost of a journal in the areas of mining, metallurgy or petroleum engineering; it also provides the member with the opportunity to get an early start at earning credits to continue his education in the mining industry. A series of technical lectures and social gatherings of students, teachers, and alumni will also be of prime interest to the members of the Society.

Our Condolence
The Amplifier staff wishes to express deepest sympathy to Lois Fordmere, whose husband passed away December 6. Lois has worked at the Montana School of Mines since 1952. In the library she worked approximately eight years with Mrs. Price. The last four years she has been recording clerk in the office of the University.

Hand Speaks to Anderson-Carlisle
On December 10, the Anderson-Carlisle Society held a meeting to discuss future plans for the Chapter, an operating engineer, as guest speaker on the subject "Adventures in Small Mining." Bill Thompson opened the meeting and introduced Mr. Hand, who has been a delegate to the Student Council and also serves as the college’s representative to the Student Council. His name has appeared on the college’s honor roll.

$35,000 from Denver
Professor McCaslin accepts title for truck and equipment from J. R. Hunt of Empire Exploration Co.
by Ernie Bond
The Empire Geophysical division of the Independent Exploration Co. rolled out the red carpet for John G. McCaslin, Associate Professor of Physics, Tuesday, December 8, when his plane landed at the Denver Colorado Airport. McCaslin went to Denver to receive some seismographic equipment that was donated to MSM by that company. The equipment includes an E-600 Ford truck, a set of 24 Century Model 501 Seismographic instruments, a twenty-four conductor recording cable, 12,000 color film, and an American gravity meter Model AG-11, which is worth about $2,000. Altogether, the equipment is worth approximately $35,000.

"We would hope by making this equipment available to outstanding research institutions, such as the Montana School of Mines, it would enable other students to explore our industry. With this type equipment available to us, the student should have a much better understanding of the book theory. The man is then in a position to do the best possible work when he reports to industry to understand and

Three Faces of Christmas

Dear Sir:

I would like to comment on your editorial regarding the Christmas season. It seems to me that the holiday is best appreciated when we ask what we can do to have the largest possible audience. What do you think? Is there a short, arbitrary application of rules that might lead to certain incidents? I believe that such incidents might result in a broad view of the world today. Is there a short, arbitrary application of rules that might lead to certain incidents? I believe that such incidents might result in a broad view of the world today.

Tom Downey

Merry Christmas and a Happy New Year.

ALBERT DERSKEN

I SEE THE WRITING...

by Mike Fredrickson

One of the most enjoyable ways to define a person is to see the writing on their face. How do you feel about having to write or say things without fearing ridicule or being misunderstood? It is an interesting challenge. I feel that people who instruct should have enough respect for the ones they are teaching to help them understand their mistakes. Some instructors have a good message, but at times it is difficult to have a positive attitude. It seems to me that the first thing is to realize that you are teaching. If you can do this, then you have the ability to help others.

The Amplifier Company

Editor's Note: Al Dersken, editor of the Amplifier, is a part-time student at The Montana School of Mines. His column appears in the October 25th, 1964 issue of the Amplifier, pertain- ing to the MSM's new Coliseum.

The city of Butte is unlike any other city in the United States. The town has laid claim to the area for over 100 years. We have been here for a long time, and we take pride in the fact that we have given service to the whole city.

The Queen of Butte

by Jolisa Tomkins

The city of Butte is unlike any other city in the United States. The town has laid claim to the area for over 100 years. We have been here for a long time, and we take pride in the fact that we have given service to the whole city.

The Amplifier Company

To the Editor

Do you know what I think of that special feeling you get when you hear someone say, "It is poison put to sound." When I hear that, I think of the Christmas season. Rock 'n' roll in contrast, is against the adolescent's understanding of the world. The parents who are going to take action should do so quietly and by filling their homes with light and music and by lighting up their homes with cheer. It is an interesting challenge. I feel that people who instruct should have enough respect for the ones they are teaching to help them understand their mistakes. Some instructors have a good message, but at times it is difficult to have a positive attitude. It seems to me that the first thing is to realize that you are teaching. If you can do this, then you have the ability to help others.

The Amplifier Company

Prudential Fellowship Awarded to Hill

Robert B. Hill accepting PF Fellowship Award from Robert Amrine, Prudential Representative.

Professor W. C. Laity, chairman of The College's Scholarship Committee, announced that Robert B. Hill, a graduate student in metallurgy, will do both his thesis and School of Mines, has been named the recipient of the Prudential Federal Savings and Loan Association Fellowship.

Hill, a graduate of Butte public high school, has also attended the Montana Smelting & Refining Company, is a member of the American Society for Metals.

Mr. Robert Aunrie, vice-president and Indiana Division for Prudential Federal Savings and Loan Association, has said that the purpose of the fellowship program is to enable special students to be able once again to study at the University of Montana School of Mines. We operate in Montana and in other parts of the United States with the mineral, agricultural, and forest industries. Since 1945, the American Smelting & Refining Company, is a member of the American Society for Metals.

In order that he might go over various phases of The Montana School of Mines, Dr. E. G. Koch, president of the University, went up to a desk marked "The Prudential Fellowship Awarded to Hill" to the students present at the meeting in Helena Monday. Tuesday's meeting was that on which the results of the interview procedure between the University and its faculty and its students were assembled.

The meeting was just a preliminary consideration of the financing of the budget in preparation for the House and Senate committees on education and the University for the 1965-66 biennium for the University of Montana system.

Traffic fines to be levied in Butte:
(1) The first violation, $1 fine.
(2) The second and third violations, $3 fine.
(3) The fifth violation, $5 fine, plus revocation of license for five years.

When compared with major colleges, the problems at Montana are very different. Problems that exist can be minimized by cooperation of the community, faculty, and staff, and students. There were some comments that if all drivers would make an effort to learn the rules of the road, it would help correct the problem. The following suggestions were made:

- No one could come out of a meeting with the traffic department and agree with the traffic director, the Montana Highway Patrol, and the Montana State Police.

- The S.T.A.M. January meeting was held on Monday, January 19, at 7:30 p.m. The meeting was opened by President Alfred Babcock, who introduced the speakers for the evening. Professor J. A. Johnsen, the director of the School of Mines, was introduced. The meeting was then opened to the students present at the meeting in Helena Monday. No one could come out of a meeting with the traffic department and agree with the traffic director, the Montana Highway Patrol, and the Montana State Police.

Have You Heard?

Ken Eluder wants to know about the new beauty parlors in Dillon. What, Ken? Need a new permanent?

Bill Chebil and Bill Novak have officially been notified by a coed that they are "stuck up." Whether they are or not is a matter of opinion.

Say hello to our winningest student sometime and find out.

Flash and Margie were seen trying to make out in the SIB one night last week by several students. What was wrong? Many witnesses.

If you feel that the men at MSM are in shape, you're in for a surprise. Last week a few intramural basketball games...

Who doesn't somersault the Rho Boys about a certain clock? Maybe you will get to class on time now, fellow.

Frank Pachus and Bob Matlacka were all decked out in their fancy Friday night attire. What reservation did you escape from, "wheelie"?

A new sorority has been formed, called the Tri-Delta (The Delta Delta Delta). Several new members are the coeds, the theme song: "I'm going to keep my amethyst and Kega-Rum, and the secret word: H.I.P.

Ray Otto sure is observant these days, too observant.

Some professors don't seem to understand the meaning of the "in" in their classes. Perhaps the fact that these professors are the mining students just before class could explain some of this confusion.

A certain Theta Tau guy has dyed his hair. How about it, Tom, do brunettes have more fun than blondes?

Romor has it that Henry Schols has a large family. How's Adrian, Colleen, and Billy these days, Henry? They're now called "the Schols." The three monksisters, Barney, Bonny, and Butch have been initiated into the group. They are now considered "the monksisters." Qualifications sure have changed!

Girls, you'd better watch out! Because when the boys are watching you, they are taking notes.

Joan Britton Champion Horsewoman at MSM

by Leona Harrington

Joan Britton, a bright-eyed fresh coed at the School of Mines, has an unusual pastime that many students at MSM don't know about. In the past three years she has distinguished herself in approximately twelve horse shows and numerous rodeos and o-mok-sees (Indian games). Since 1962, she has been awarded nine trophies and three all-point championships. She has been grand champion senior showman and in addition has two plagues and over 500 ribbons.

She usually shows three of her family's horses. (The Brittons have 10): Powder for Western Classics; Dakota for jumping and English classes; GI GI for barrel racing, pleasure riding and showmanship contests. The horses are bred a quarter horse-thoroughbred cross.

She has also shown and trained horses for other people and for contests. She races, rides, jumps and shows these horses for experience. If she would accept money she would be unable to retain her amateur standing.

She is unable to show as extensively as most people with this type of hobby. She usually manages to attend three or four shows a year, and this year she barrel-raced at several rodeos.

Advice Too The Loveworn
by Ann Slanders

Dear Ann:

I've really got a problem! I am thirteen years old and go to P.S. 49 in Bayonne, New Jersey. I am cute, attractive, lovely, neat, clean and well built.

Last year I started having an affair with an older man. Pierre is forty-nine, married, and has seven children. His wife is a shrew who bounds him and never lets him have moments respite from her angry tongue. She refuses to serve him his breakfast in bed and wouldn't get a job when Pierre decided to go on welfare. He has offered to divorce her and marry me.

My problem, Ann, is what should I wear to my eighth-grade graduation?

Hotchta Kid!

Dear Hotchta:

You have got a problem! But I have a bunch the police and the District Attorney will help you solve it very soon. I will send you their letter.

Ann

Mernly having an open mind is nothing. What it means is, as of opening the mouth, is to shut it again on something solid.

Coaches Tom Lester, Ed Simonich and Jim Freeborn map B-Ball strategy at Otediggers' practice.

Coach Ed Simonich, the School of Mines coach and his two assistant coaches, Tom Lester and Jim Freeborn are in the stage of developing the basketball squad for the 1964-65 season.

Simonich has been working with the Mines team for the past eight years and has done a remarkable job considering the enrollment of the Mines teams for the past eight students and the absence of athletes with only two regulars returning. He stated in an interview that the team is doing a regular job.

The basketball tournament at the School of Mines basketball for the School of Mines football team was honored.

FOOTBALL TEAM HONORED

The 1964 Montana School of Mines football team was honored at a dinner at Raymond's on December 9, by Mr. Jim Evans.

The annual dinner honoring the football players was started three years ago by Mr. Evans. Evans was the honored guest at the Homecoming game with Northern Montana College.

The guests at the dinner were, Coaches Ed Simonich, Gene Downey and Dan McCarthy. Professor Arthur Adami and Mr. Vic Braizl, also present.

Don Brunell introduced the Annual dinner honoring the football players, was held on Friday night, was held on January 9 against the Northern Lights of Havre.

Despite the team's success, the head coach, Mr. Simonich utilized the entire team against Ricks, experience as well as lack of height to be the deciding factor in the first game.

COPPER CORNERS

Montana copper products for decorative and practical use in the home will be found in this gift-giving season in Copper Corners in many stores and shops as a result of a promotional program of the Copper Development Association.

Copper for untold centuries has served mankind in ornamental and functional use and has successfully competed with other materials as they were developed. It has many uses in the modern home because copper products fit into all styling periods and every room in the house. Furthermore, copper products can be made tarnish-free and polish-free through non-toxicity of clear, protective coatings of proven durability.
