CONCERT TONIGHT IN MUSEUM HALL

The Chamber Ensemble of the University of Oregon School of Music will present a concert tonight in Museum Hall at 8. Admission is free.

The members of the group are Barbara Myrick, flute and piano; Delbert Sisman, piano and harpsichord; and Richard Long, lute.

All of these are students in the School of Music at the University of Oregon at Eugene.

Barbara Myrick, who was born and received her early education in Butte, was elected Archon of the fraternity. He is the son of Mr. and Mrs. Wilfred R. Pederson of Billings.

The Delta Chapter of Sigma Rho, national engineering fraternity was organized in Butte in 1923. Activities to celebrate the organization's fiftieth anniversary are being planned by members of the fraternity at Montana Tech.

ARCHON

Sigma Rho Fraternity recently held election of officers for the year. Robert J. Pederson, former Archon of Butte was elected Archon of the fraternity. He is the son of Mr. and Mrs. Wilfred R. Pederson of Billings.

Other officers are John C. Roberts of Libby, Vice-Archon; Andrew M. Chadwick of Lewiston, Secretary; and Richard C. West of Charlotte, North Carolina, Treasurer. Each of these positions has a one-year term of office.

The Delta Chapter of Sigma Phi, national engineering fraternity, was organized in Butte in 1923. Activities to celebrate the organization's fiftieth anniversary are being planned by members of the fraternity at Montana Tech.

Bob Pederson

CONCERT TONIGHT

Danny O'Keefe will headline the second Folk and Fun concert in the Montana Tech gym tonight at 8 p.m. O'Keefe's hit single, "Good Time Charlie's Got the Blues," has been on national record charts for several months.

Comedian Ron Douglas, noted satirist, also will perform for the event sponsored by the Montana Tech Cultural Improvement Committee.

O'Keefe writes most of his own songs and has recently released an album on Atlantic records, "O'Keefe." He also does guitar solos.

Tickets at Tech and high school student and adult prices are on sale in the Montana Tech Bookstore and Woolworth's record department.

SENIORS

If you plan to graduate in June 1973 or February 1974 you should be aware that you are required to take the Undergraduate Record Examination. This examination is now scheduled for Friday, 1 p.m., April 6th. Please reserve this date since a make-up test is not possible.

AMST Low on Money

The Executive Committee of the AMST at its meeting held March 1, 1973 set up a new meeting night. Regular meetings will now be held on the first Thursdays every month at 7:30 p.m.

The Dance Committee has enough money to sponsor more dances, according to chairman Mike Bowman.

The financial report given showed that the Mineral Club had overspent its appropriations. As a result, the Mineral Club will not be allowed to spend any more money.

Tom Hohn suggested that a letter of thanks to KXLF for their excellent coverage of Engineering Week. John Likarish noted that the balance in the general fund is only $9,000 compared to approximately $5,000 at this time last year.
Petroleum Department

Tech's Petroleum Engineers: $1,000 for freshmen, sophomore, junior and senior students, will continue its grant of $4,600 to Montana Tech.

The 1973 Magma Staff would like to thank the Student Council, John McCarthy — President, for sponsoring "Picture Day" on the Montana Tech Campus. A special thanks to "Sherriff" Joe Brinkerhoff for originating the idea.

Magma will be graduating seniors. We hold a regular yearbook staff meeting on Monday nights at 7:00 p.m. in room 119 and we welcome any help or suggestions you may have.

Don't be camera shy, we welcome your smiling face in our office any time.

Magma is progressing fantastically, we will have the first 55 pages of the yearbook in the hands of the publisher by March 1st. Magma will be in your hands by the middle of September, 1973. Wish us luck with the remainder of the book.

25 Attend Log Interpretation Workshop

Twenty-five industry representatives from seven states and Canada attended a workshop offered by Montana Tech on advanced log interpretation techniques.

The course was conducted by Dr. Wilfred R. McLeod of the Petroleum Engineering Department and Dr. Douglas Hiltzie of Dresser Atlas Industries, a former Tech professor in the Petroleum Engineering Department.

The participants in the course were from varied engineering backgrounds, including: petroleum mining, geological, metallurgy and mechanical engineering.

McLeod made it an intention to offer additional petroleum-oriented short courses at Montana Tech in the future in order to aid industry personnel in keeping up-to-date with rapid changes taking place in our industry.

The 1973 Magma Staff would like to take this opportunity to thank the Student Council, John McCarthy — President, for sponsoring "Picture Day" on the Montana Tech Campus. A special thanks to "Sherriff" Joe Brinkerhoff for originating the idea.

We would also like to thank the 150 students who willingly or unwillingly came down to the Magma Office to have their pictures taken.

But nevertheless there are still over 400 dead, lackadaisical or disinterested (maybe just plain apathetic) students who are still unphotographed.

We, therefore, have come to the conclusion that unless we can photograph the entire student body, the only pictures that may appear in the 1974 annual will be graduating seniors.

Granted, Magma has had more than its share of problems, but with a new advisor and staff, we feel that the 1973 annual will be the best.

Don’t just stand around, get involved! Make Tech the best school in the state from all standpoints including extracurricular activities. Sincerely, THE MAGMA STAFF.
SPUTTER'S TECH'S BUSY BODIES

Have you noticed the smiling faces darting around the school—'They're Sputter Techs! What would we do without them? Well, we wouldn't have any place to put our trash, we wouldn't have any coffee or hot dogs to eat while we're sitting on our lunch break, and we wouldn't have had fun at Sputter Tech Hill. But, if we were greener as we are, we wouldn't have any coffee or hot dogs to eat at Sputter Tech Hil. So, we are Sputter Techs."

Janice Bassard makes Shamrocks for the SUB.

In a cramped room in the dorm, things can be a little tense...Spurs keep going!

Project Recycle Expects to Profit

Although Project Recycle at Montana Tech does not function to make a profit, it is expected to realize $2,000 a year. The money realized from the project will go to fund environmental projects of the students at Montana Tech.

According to Professor Floyd Bossard, the head of Project Recycle, about a ton of paper a week is the average collected. The amount of paper, however, is about 2 to 3 tons per week. Approximately a half of a ton of tin cans is collected every week.

The class in Air Pollution, taught by Bossard, is responsible for the collection of all the paper and cans. Consisting of 10 people, the class, makes collections at thirty pick up centers located throughout the city, including schools, the Business College and two shopping centers.

The main interest of Project Recycle, according to Bossard, is to get people interested in the business of recycling in order to conserve natural resources. The project is concentrating mainly on the recycling of cans and non-ferrous metals.

Approximately 10 percent of all the paper and tin cans in Butte are presently being collected through this project. According to Bossard, the Butte High School and some of the restaurants in Butte would join with the Student Union Building at Tech, the West End and East End High Schools, and the St. James Community Hospital, in the project. Bossard has the students interested in the project. Project Recycle is getting help from Walt Bikee, owner of Bikee's Cycle, on Saturdays. Bobbo has the workers interested in the project and the students interest in the project.

Approximately 3 percent of the students are interested in the project and the students have the opportunity to be able to plant another 33,000 trees.

Approximately 3 percent of the students are interested in the project and the students have the opportunity to be able to plant another 33,000 trees.
Elsewhere in Education

Additional enrollment trends, including fewer freshmen but more graduate and postgraduate students, were reported by Garland G. Parker, in his report at the annual meeting of the North Central Association of Colleges and Universities. Parker, in his report to the association, said, "The admissions scene in the Midwest last year showed a marked decline as compared to the previous year. However, the trend has been reversed for the current year." Parker cited the University of Wisconsin-Madison, with a decrease of 4.6 percent, and the University of Michigan, with an increase of 1.8 percent, as examples of the change. He also noted that the University of Illinois and the University of Minnesota showed decreases of 4.7 percent and 4.2 percent, respectively.

In other trends cited by Parker, the number of applications for admission for the fall semester have increased by more than 10 percent. He said, "This increase is likely due to the continued growth of the economy and the increasing number of students seeking higher education." Parker also noted that the number of students receiving financial aid has increased by 20 percent, with the majority of the increase coming from state and federal sources.

Special Olympics

On March 10 a demonstration was held in the Tech gymnasium for the students in Mrs. Mansfield's College of Physical Education in the Elementary Schools, presented by Mr. George Briones, recreation director for the Boulder River School. This demonstration was to acquaint the class with teaching methods to the mentally handicapped which the students will use in training Butte's handicapped for the special olympics to be held at Montana Tech in May. The demonstration was interesting to attending for it proved the ability of the handicapped to learn physically, mentally, and the worth of a special physical education program. The eagerness and ability shown by the children performed the success of the Boulder program, as Mr. Briones told the class, the students in their undertaking of the Butte program.

Sen. Weicker Holds Dialogue with Students Over Telephone Lines

Calling for full-fledged communications between the federal government and the country's young people, Sen. Lowell P. Weicker, Jr. (Conn.) is conducting weekly telephone interview sessions with Connecticut's junior high and high school classes.

"In a letter to more than 300 public and private schools throughout the state, Senator Weicker offered a half-hour-of-the-air question and answer period via telephone equipment - to two different classes per week, beginning in March. "The telephone interviews will help me see a picture of the important concerns of Connecticut's young citizens," Senator Weicker said."
