This Book is brought to you for free and open access by the Student Newspapers at Digital Commons @ Montana Tech. It has been accepted for inclusion in Amplifier (1955-1977) by an authorized administrator of Digital Commons @ Montana Tech. For more information, please contact sjuskiewicz@mtech.edu.
ASMT Meeting

At the Executive Committee meeting of the ASMT held on 23 March, 1973, Dr. Fred DeMoney presented an extensive examination of the budget outlook for the college for the coming biennium. He stated that despite the decrease in funding, his goal is to maintain academic quality.

Among other business, the Executive Committee approved $250.00 to the Walk for Mankind, to be paid back immediately after the walk is over.

John Likarsh noted in the financial report that basketball is over. The computer center will determine exactly how much money will go to each sharing group.

Each sharing group will receive twenty percent of all the money which was collected for it. Walkers who choose to walk for a specific sharing group should make sure that the appropriate number is in the designated place on the sponsor sheet or the money will revert to Project Concern.

Letters have been sent to non-profit organizations throughout the city. If by any chance your group has not received a letter, please write to the Walk for Mankind Office, care of Wendy Swanson, Room 303, Montana Tech Residence Hall, or phone Miss Swanson at 792-5037.

Egg-Dropping Contest

M-Day, May 2

A few eggs will be cracked—do not into a frying pan—on M-Day, May 2 at Montana Tech.

Mystery Man Revealed

Moritz Ferdinand Gaetzschmann was born in the year 1836 in Saxony. He intended to compile a dictionary of mining terms. He intended to compile a dictionary of mining terms.

Also, from 1838 until May 1846, he attended the Ninth Annual College Business Symposium to be held in Helena on 5 April. Of the six students, two will represent the business classes, and two will represent the student council. Dr. McQuire is the faculty member attending.

RESIDENCE HALL

For the purpose of maintaining a reasonably clean and quiet residence hall environment, a weekly room inspection will be held each Wednesday in accordance with the schedule below. The inspection will be conducted by the resident assistants, together with Dean Stolz.

Wednesday, April 11, 1973

Room 1st floor—north
7:00 p.m.

Room 2nd & 3rd floors
6:00 p.m.

Main floor and basement—north
7:00 p.m.

Main floor and basement—south
7:00 p.m.
To Beautify Butte

Project Thirty-Five Hundred: a beautification plan for Butte, its trees and shrubs and during the month of May.

According to Professor Floyd Bowerman of the Environmental Engineering department, Tech’s trees will be planted from Walkerville south to the highway and west.

Two trees will be planted through the month of April and up through May 2, M-Day.

Professor Bossard said that any person or group is invited to plant trees. The plants and tools are available; assistance is required, however, in order to plant all the trees.

Commercial fertilizer is also needed. Financial assistance is welcome for this purpose. Any excess funds will be used to purchase seeds for planting next year.

Volunteers should, if possible, bring pick and shovels they are available. Supervisors will be available any time to direct the planting.

According to Bossard, the normal number of trees that can be planted from 2 to 600 seedlings planted per person. Those who wish to plant trees in the community such as parks, playgrounds, or empty lots, plants and tools will be provided for them.

The available plants include Douglas Fir, Ponderosa Pine, Colorado Spruce, plus buffalo berry, choke cherry, and Russian Olive.

Professor Bossard said that his engineers will devote the entire month of April to Project Thirty-Five Hundred.

The letters have been sent to community organizations inviting them to participate in the program. The community, in turn, will be asked to help the various organizations.

From last year’s planting, approximately 55 percent of the seven thousand trees planted survived through September of 1972. 25 percent survived through the winter. The survival rate, then, was 9 to 10. Bossard said that this exceeds the goal for last year to have 1 to 4 trees survive.

This year, the forest Service is expected to donate several thousand trees.

Dr. Bowerman said that his engineers will work on projects directed at the setting up of workable standards by which to measure environmental problems and their solutions.

Tholstrom Receives Promotion

A Montana Tech alumna, Kendell Tholstrom, has recently been elevated to Director by the Atlantic Richfield Company to its staff by the Atlantic Richfield Company.

The Anaconda native was a 1968 graduate of a B.S. in Petroleum Engineering and also receives a degree for the same field from Montana Tech in 1971. He joined the Atlantic Richfield Company in 1971 and has served in their Denver, Colo., and Capp.

Tholstrom and his wife, the former Claudia Sale of Anaconda, and their two chil-
dren, Holly 3 and Trista 2, have established a new resident at 3242 Shcrocker, Panoa.

Burke Replaces Carling on KMSM-FM Staff

John Burke, a sophomore at Montana Tech, was appointed to the position of News Director for radio station KMSM-FM. As News Director for the station, Burke’s duties will include the assimilation and compilation of local, campus, and station news for broadcast.

Mr. Burke, an English major, replaces Mrs. Mary Ann Carling as News Director for the station. Mrs. Carling recently resigned her position due to her continued interest in KMSM-FM in order to devote more time to publishing a commemorative edition about Montana Tech.

Mr. Burke, from Great Falls, has been actively involved with campus activities. Currently, he is a treasure for this year’s Walk for Mankin.

Former Tech Student Recognized For His Photographing Skills

William Baror, former Tech student, currently working in American Samoa for the United States Security Administration, has been recognized for his photographic skills in the American Samoa Journal.

Baror, employed in the installation of educational television in the schools of American Samoa by the American Samoa Public Broadcasting Association, was honored with a $100 prize.

Baror, a resident of Butte, Montana, was honored for his photographic skills.

Election Day Changes

day by Dick West

A great deal has been said for and against changing the election day for ASMT officials from M-Day to some other date. If these arguments are viewed objectively, I believe the concept can be cleared up.

Some students are against changing the date because it has become a tradition at Tech to have elections on M-Day. I have a great deal of respect for tradition, but I also believe that tradition must be examined to determine that it is desirable when a change is needed. The purpose of tradition is to establish procedures that prevent the loss of time. When these procedures become counter-productive, then obviously the value of the tradition is lost and a new one must be started to replace it.

If a tradition is voting on M-Day is a tradition is voting on M-Day, there are many reasons to account for this fact, and they range from students being apathetic to students being too drunk to vote. These aren’t really important; they are just symptoms indicating that something is wrong.

What is important is electing officials representing the philosophies of the students. This is the function of a democratic government, and anything that tends to invalidate this principle is undemocratic, whether it is traditional or not. The purpose of changing the date will be to increase the voter turn-out should be sought after. If more students can and will vote on a day other than M-Day, then the date should be changed.

Tech’s future faces many problems, and its only hope lies in the hands of the students. There are many reasons to account for this fact, and they range from students being apathetic to students being too drunk to vote. These aren’t really important; they are just symptoms indicating that something is wrong.

The purpose of changing the date will be to increase the voter turn-out should be sought after. If more students can and will vote on a day other than M-Day, then the date should be changed.

The final election ballot shall contain the names of the two candidates receiving the highest percentage of the total number of votes cast by the number of students at the college and then multiplying by 100.

M-Day — May 6, 1970 — Election 42.2%

M-Day — May 5, 1970 — Run-off election 58.0%

May 16, 1979 — Run-off election 58.0%

As can be readily seen, elections held during school hours have had a higher percentage of voter turn-out than those held on M-Day. There are many reasons to account for this fact, and they range from students being apathetic to students being too drunk to vote. These aren’t really important; they are just symptoms indicating that something is wrong.

Athletics Helped Overcome Kent State Tragedy

By Robert Markus, Chicago Tribune

Like most people, I too knew about Kent State University. I knew that it was a school touched by tragedy; I knew in an all too real manner what a tragedy is; I also knew that the athletic program has helped in that respect, serving as a rallying point for all students.

Lone was not at Kent State when the tragedy occurred, but was keenly cognizant of his aftermath. He had applied for the Kent job at the urging of a friend after being fired as head football coach at Colorado State.

"Shortly after I sent my application I was at Iowa and I talked to the athletic director there. I was told to be there at 9:00 a.m. I arrived at 9:00 a.m. I didn't hear from the University for a long time after that, because, I'm sure they were having a little trouble." He is a be- liever in that old cliché that you coach better when you have good players. But Lone doesn't believe in that philosophy in college football. You can fire the coach—and in my own case I believe, under the circumstances they had to fire me—but unless you change some conditions, you don't change the results.

"It's like changing jockeys on a horse. The horse may surge for a while, or the jockey training out of his class he'll eventually fall back right where he was."

Some of the changes Lone made at Kent were to relieve the head coach of teaching responsibility and to make money available for recruiting. "The head coach used to have to teach class. He got cut off, and in college football. You can fire the coach—and in my own case I believe, under the circumstances they had to fire me—but unless you change some conditions, you don't change the results."

The Montana Tech Orediggers football team of 1973 will be bolstered by two new players joining the Oredigger squad this spring.

Kevin Kavanagh, 6'1", 175 lb. running back from Powell County High School. "I know a little more about it now after huddling with Kent's athletic director, Mike Lude, I know that Kent State's football team was very much the for the first time in its history and wound up in the Tangerine Bowl."

I knew, too, that while the school may still bear the scars of the 1970 tragedy, it is famous, perhaps, for the fact that the athletic program has helped in that respect, serving as a rallying point for all students.

"I did nit like any negative attitudes about athletes," he said. "If I had, it might have affected my decision to take the job, but I can't really say that because the idea of school sports serving as a rallying point and helping return things to normal." Lone is a strong believer in the value of intercollegiate athletics and has some ideas that some educators might find a bit radical. "I believe that an intercollegiate athletic program has the ability to self-sustaining any more than any other program in the school?" The way I look at it, we're in the performing arts. I don't think we have to be as materialistic about it as others think. I think life is a little more enjoyable because there 18 college football."

"Lone's high school career is JeJanson1's high school career pleased with the view-
